MESSAGE FROM THE FOUNDER

As the Terry Foundation approaches its twenty-fifth anniversary next year, a modest beginning in 1986 has evolved into the state’s largest private source of scholarship funding for eight Texas public universities. After its first seventeen years at the University of Texas at Austin and Texas A&M University, the Foundation expanded in 2004 to include Scholars at the University of Houston and at Texas State University-San Marcos. Later in 2006, the program expanded again to the University of Texas at San Antonio and the University of Texas at Dallas, and again in the fall of 2010 to the University of North Texas in Denton.

In 2010, the Board of Directors approved additional growth for the Terry Foundation Scholarship Program to Texas Tech University in Lubbock. The first Scholars for Texas Tech were selected at interviews in April 2011 and will begin college in the fall of 2011. The Foundation is pleased to welcome this outstanding institution to the Terry program.

This past April, the Foundation selected 200 new 2011 Scholars. This will bring the total number of active Terry Scholars at all eight universities to 698.

The spring of 2011 also brought graduation to 133 Terry Scholars who join a growing body of Scholar Alumni that now numbers over 1,600. Our growing family of graduates are serving their communities in virtually every occupation and field of service imaginable. We greatly appreciate the many letters we get from our alumni around the world.

In October of 2010, the Foundation was honored by the National Association of Scholarship Providers at its annual conference in Denver by being selected as the National Scholarship Provider of the Year. The Foundation joins a small and distinguished list of outstanding organizations who have been recognized with this prestigious award.

On behalf of the Board of Directors and the Foundation staff, we would like to thank all the participating university staffs for their invaluable assistance during our annual interview process as well as their continued support throughout the year.

Remember, the harder you work, the luckier you get!

Howard L. Terry
July 21, 2011

The award ribbon pictured on the cover is symbolic of the Foundation’s being honored as the 2010 National Scholarship Provider of the Year by the National Association of Scholarship Providers.

“Success is the attainment of the goals you’ve set for yourself in life.”
— Howard L. Terry

The Terry Foundation’s goal is to improve and develop the State of Texas by assisting Texas students to attend the state’s finest public universities. The Foundation hopes that these students will have a significant impact on the future leadership of the state and nation. To achieve this goal, the Foundation awards scholarships to students who meet the high standards set by the Founders.

What began in 1986 as a small scholarship program is now the state’s largest private source of scholarships for the University of Texas at Austin, Texas A&M University, the University of Houston, Texas State University-San Marcos, the University of Texas at San Antonio, the University of Texas at Dallas, the University of North Texas, and Texas Tech University, with over 650 Terry Scholars enrolled. But its origin was neither large nor legendary — it was as humble and low-profile as the Founders whose name it bears.

The Terry Scholarship Program was born of a desire of Howard and Nancy Terry to help young people to help themselves. A longtime resident of Houston, Howard Terry had been active for many years in banking, construction, real estate and oil and gas. With profound business success over the decades and their family’s needs met, the Terrys developed a growing desire to give back to the community and, specifically, to help young people to reach their goals in higher education.

In 1986, the Terrys began considering a variety of options in their desire to make a lasting contribution to the future of Texas higher education. After evaluating ideas as varied as university campus construction projects and endowed-chair faculty positions, the Terrys were still not satisfied. Knowing that universities are more than buildings and classrooms, Howard Terry had repeatedly declined to allow the universities to honor his previous contributions by placing his name on campus structures: “Mortar and bricks will eventually be torn down,” he reasoned. The Terrys believed, in the long term, that a university — like the state it represents — is only as good as the educated citizens it produces. Thus was born a desire to invest in the students who would attend the public colleges and universities in Texas.

The Terrys’ desire to help young people was influenced greatly by Howard Terry’s own college experience: he had attended the University of Texas on an athletic scholarship, becoming captain of the football team and graduating in 1938. His family origins in Cameron, Texas were modest and it was only through the generosity of others that his college education had been made possible. Mr. Terry never forgot the helping hand that he had received in attending college and was determined to extend that same help to a new generation of students.

After seeking counsel from sources that included former UT coach Darrell Royal (an original Foundation Board Member) and Houston attorney Rhett Campbell (Board Member since inception and now Board Chair), the Terrys determined that their most lasting contribution would be through a perpetual endowment that would provide college scholarships for students who had demonstrated the capacity to become outstanding future leaders and who needed financial assistance to achieve their goals in higher education. From this simple concept, the Terry Foundation was created in 1986 to be the source of a perpetual scholarship program.

The first scholarship recipients, known since then as “Terry Scholars,” were selected at interviews held in the spring of 1987. That original class of...
The earliest Scholar classes at each university numbered as few as eight.

seventeen 1987 Scholars was joined in the 1988-1989 academic year by seventeen additional recipients. Over the years, the number of Scholars selected has increased, with the most recent spring 2011 interviews having resulted in the selection of 200 new freshmen Scholars. These recipients will join the upper-class Scholars to number 698 Terry Scholars enrolled for the 2011-2012 academic year.

During the first seventeen years of the Foundation's history, Scholars attended only the University of Texas at Austin or Texas A&M University. In the fall of 2004, the Foundation Scholarship Program expanded for the first time, when Terry Scholars were named at the University of Houston and at Texas State University-San Marcos. Additional growth provided scholarships in 2006 at the University of Texas at Dallas and the University of Texas at San Antonio, and again in 2010 at the University of North Texas. In the fall of 2011, the program will expand again to include Scholars at Texas Tech University. Strategic future plans call for the program's ultimate expansion to other public universities in Texas.

Since its inception, the Terry Scholarship Program has assisted 2,600 Texas college students to achieve their goals in higher education. The Foundation Board oversees a large endowment and now includes four members who are Terry Scholar Alumni. The program was honored in 2010 by the National Association of Scholarship Providers in being named National Scholarship Provider of the Year. Chartered to exist into perpetuity, the Foundation is designed to continue in the future to add scholarships each year.

Howard and Nancy Terry continue to be participants in the scholarship program that bears their name. It has become larger than they ever imagined, fulfilling in the process their dreams of making a difference in the lives of students across the state. Despite his extraordinary success in ventures that made the Terry Foundation possible, Howard Terry observes that "the Terry Foundation is the most important thing I've done in my life, because it's enabled me to help more people than I would have ever been able to help otherwise."

Founders Howard and Nancy Terry with the Terry Scholars, Directors, staff, Alumni and special guests. 2007 Winedale Picnic.
Criteria

The Terry Foundation awards scholarships to Texas high school seniors who have been accepted for admission to the University of Texas at Austin, Texas A&M University at College Station, the University of Houston, Texas State University-San Marcos, the University of Texas at San Antonio, the University of Texas at Dallas, North Texas State University, or Texas Tech University. To be selected to receive a scholarship, potential Terry Scholars must demonstrate academic excellence, leadership and financial need.

Terry Scholars are distinguished by a deep-rooted desire to enrich the general welfare of the community and an established record of leadership. In order to select Scholars with the greatest potential for success, the Foundation’s selection committees focus on candidates with a demonstrated history of involvement in activities, outstanding scholastic achievement and a well-rounded personality marked by a desire to succeed.

Nominations for Terry Scholarship awards are accepted only from the designated offices at the eight universities affiliated with the Foundation. Nominations are not accepted from any other source.

The Selection Process

Each year in April, the Terry Foundation announces the new class of Terry Scholars after an intensive two-step selection process. Early each spring, the universities nominate candidates from the freshman class that will matriculate the next fall. In selecting nominations, the universities adhere to the selection criteria guidelines established by the Terry Foundation.

While the numbers of nominations and subsequent scholarships have grown substantially since the first scholarships were awarded in 1987, the process to win a scholarship has remained highly competitive. In selecting finalists, the selection committees at the affiliated universities are limited to a small fraction of the thousands of applications received.

The Foundation administration invites the finalists to formal interviews conducted each spring concurrently in Austin, Houston and Dallas. Finalists meet with a six-member panel consisting of members of the Foundation Board of Directors, Alumni Scholars and current Terry Scholars. The interview panels make the final selections and new Scholars are notified prior to May 1st of the interview year.

In April 2011, the thirteen interview panels met with 416 finalists for the final selection process. Of those finalists, 200 were selected for Terry Scholarship Awards.
**The Stipend**

The Terry Scholarship Award holds the potential to be a four-year stipend. Initially, the scholarship is awarded for a Scholar's first year of college and is renewed annually at the discretion of the Board of Directors. In order to continue as a Terry Scholar, a student must maintain a cumulative GPA of 2.5, meet the requirements for mandatory attendance at specific Terry Foundation events and fulfill other reporting requirements.

The amount of the stipend is based on the cost of attendance at the universities, including tuition, fees, books, on-campus room and board and miscellaneous expenses. The actual specific amount of the stipend will vary for each Scholar, depending on other scholarship awards and the ability of the Scholar's family to contribute to the cost of college. Over the years, the average amount of the stipends has increased each year due to increases in cost of living and tuition.

The Terry Foundation seeks to provide adequate financial support for each Terry Scholar so that students may concentrate on academics and college-related activities, without having to incur debt to finance their education. In addition, the Scholarship Program is designed to eliminate the need for Scholars to work during the college years.

**Funding**

The Terry Scholarship Program is funded by the earnings of a substantial endowment that has been provided solely by the Founders and is managed by the Terry Foundation. The Foundation is chartered to exist into perpetuity and anticipates additional growth based on incremental endowment by the Founders.
Texas Tech University has the distinction of being the largest comprehensive higher education institution in the western two-thirds of Texas and serves a region larger than 46 of the nation's 50 states. Located in Lubbock, Texas Tech has grown to become a major research university while retaining the feel of a smaller liberal arts institution. Texas Tech's enrollment of more than 30,000 allows students to have one-on-one interactions with top faculty in a traditional campus atmosphere.

The university offers more than 150 bachelor's degrees, 100 master's degrees and 50 doctoral degree choices. Plus, as part of the Texas Tech University System, Texas Tech shares the same campus with its sister university, the Texas Tech University Health Sciences Center. The close proximity makes Texas Tech the only institution in the state with undergraduate and graduate schools, a law school and medical school all on the same campus, which facilitates the transition to professional studies.

A strong art and music program is balanced with growing research in a number of sustainable energy areas. New areas of research in solar and nuclear energies as well as smart grids and storage are supported by major endowed chairs. Texas Tech researchers are also known for their work in creative and technical writing, food safety, environmental toxicology and wind science.

Texas Tech students come from nearly every county in Texas, almost every state in the Union and more than 100 countries. Students study on the TTU campus in Seville, Spain and participate in programs in more than 80 countries. They win prestigious, nationally competitive scholarships such as the William J. Fulbright, Gates-Cambridge, and Barry M. Goldwater Scholarships and are
known for national academic championships in chess, animal sciences, debate and law.

Texas Tech is proud to boast of one of the finest and most diverse faculties in the nation. Faculty members excel in teaching, research and service, as well as winning prestigious national awards. In 2010, three faculty members received CAREER awards from the National Science Foundation. These awards recognize the brightest and most promising young faculty from across the nation. The Texas Tech Phi Beta Kappa chapter received the highest possible rating for 2008-2009 from the national Phi Beta Kappa Society.

Community engagement plays an important role at Texas Tech. In 2006, the university was one of the first 62 institutions in Texas to earn the Carnegie Foundation’s classification for Community Engagement. In 2007 and 2008 the university was named to the Corporation for National and Community Service President’s Higher Education Community Service Honor Roll. In 2009, more than 197,000 individuals participated in TTU community partnerships and activities; 118,000 of these were K-12 students and teachers.

Texas Tech is home to the Lubbock Lake Landmark, an internationally known archeological site; the Texas Tech Museum, which is accredited by the American Association of Museums; Texas Tech University Press; the Maedgen Theatre, home to Texas Tech University’s Department of Theatre and Dance productions; and the Moody Planetarium. Lubbock is a thriving city of 218,000 people that is the economic and medical center of a 26-county region. While Lubbock has maintained a rich agricultural heritage with cotton remaining the major crop with 2-3 million bales of cotton produced annually, it has become a major retail and medical center for the Texas South Plains and Eastern New Mexico.

Lubbock has a rich quality of life with varied music and cultural venues. The Lubbock Symphony Orchestra recently celebrated its 50th anniversary. Ballet Lubbock and the Lubbock Chorale also thrive in the city, along with an annual Arts Festival that brings visitors from across the region. The Underwood Center for the Arts and numerous small galleries and community theater groups anchor a strong arts and theater scene.

There is no better place to be right now than Texas Tech University. Not since the university was founded in 1923 has there been such opportunity or momentum. Graduate and undergraduate enrollments are at record levels. Total research expenditures topped $125 million this year, up from about $50 million in 2008. Faculty and students are winning international acclaim. TTU is recruiting and hiring top-flight faculty in a variety of disciplines. The Texas Tech goal is simple: become one of the nation’s great research universities.
During its rich 120-year history, the University of North Texas has progressed from a private normal school to a large, comprehensive public research university with 12 colleges and schools offering 97 bachelor’s, 88 master’s, and 40 doctoral degree programs, many nationally and internationally recognized.

The flagship of the UNT System, UNT is the leading university in the North Texas region and an important driver for the country’s sixth-largest economy. With more than 36,000 students, UNT ranks 33rd nationally in enrollment among all four-year public universities and is among the largest universities in Texas.

Known for its comprehensiveness, UNT is a diverse institution that is furthering its impact in science, engineering and nanotechnology while building on its foundation in the arts, education and business. As a university at the forefront of change, UNT provides a broad-based, student-focused education powered by award-winning faculty who unleash students’ potential and advisors and mentors who help guide and keep them on track in earning their degrees.

The more than 7,900 students who graduate from UNT each year join the university’s more than 326,000 living alumni who already are transforming the world. The university boosts the regional economy by more than $1.3 billion annually, and UNT alumni boost the area’s economy by more than $10 billion annually.

The university has been named one of America’s 100 Best College Buys for 15 consecutive years and offers the quality of a private university at an affordable cost. It is listed as a “Best in the West” college by The Princeton Review.
UNT attracts students from all walks of life — from students who are the first in their family to earn a degree to those who transfer to the university to complete their educational journey. UNT is among the top 50 universities in the nation for the number of undergraduate degrees awarded to ethnic minority students, who account for more than one-third of the university student body. Among public universities, UNT ranks first in Texas and fourth nationally for the enrollment of transfer students.

The university’s diverse population includes nearly 2,000 international students who come from every corner of the world, and UNT students hone their worldviews through a global-minded education steeped in an appreciation of other cultures and study abroad. UNT is one of the top producers of doctoral graduates in Texas, and it plays a critical role in keeping the state’s industries vibrant and competitive while contributing to the global knowledge base.
Advisory Board Member Abby Howell (TAMU 2001), Scholar Alumna Kristen Cummings (TAMU 2004) and Advisory Board Member Brian Carroll (UT-Austin 1994). 2010 Alumni Luncheon.

Terry Foundation ★ ★ ★ ★ ★
The University of Texas at San Antonio is one of the fastest-growing higher education institutions in Texas and the third-largest academic institution in the prestigious University of Texas System. Located in the seventh-largest city in the nation and second-largest city in Texas, the university has become the regional center for higher education, reflected in more than a 30 percent growth in enrollment over the last 10 years.

Created by an act of the Texas Legislature in 1969, UTSA enrolled its first students in 1973. In its short history, the university has grown to an enrollment of more than 30,000 students and three campuses: the Main Campus in northwest San Antonio with more than 30 buildings for teaching, research and student life on two tracks totaling 725 acres; the Downtown Campus with four buildings on 18 acres; and the HemisFair Park Campus, home of the Institute of Texan Cultures, a museum with 45,000 square feet of exhibit space and five recreation Texas Frontier structures.

UTSA serves more students than any other higher education institution in South Texas, offering more than 130 degree programs in eight colleges: College of Architecture, College of Business, College of Education and Human Development, College of Engineering, College of Liberal and Fine Arts, College of Public Policy, College of Sciences and Honors College. Master’s and doctoral degree programs are coordinated through the UTSA Graduate School. Thirteen percent of the student body is enrolled in graduate programs.

As the region’s largest generator of engineers, artists, business professionals, teachers, scientists and technology managers, UTSA has produced more than 80,000 alumni since awarding its first degrees in August 1974.

The university’s campuses provide access and opportunity for large numbers of historically underserved students. More than 60 percent of UTSA’s students come from groups underrepresented in higher education and many are the first in their families to attend a college or university.

Outside of the classroom, students may choose from more than 280 student organizations. UTSA’s Recreation Center boasts the tallest indoor rock climbing wall at a Texas college. The university also offers students on-campus housing and an expanded University Center.

In December 2008, the University of Texas Board of Regents granted the university permission to expand athletics with the
addition of an NCAA Division I football program. In March 2009, the university hired Larry Coker, who led the University of Miami to a national championship in 2001, as the Roadrunners founding head football coach. UTSA will play its first football game in the Alamodome on September 3, 2011. In 2012, the Roadrunners will compete in the Western Athletic Conference.

Today, as an emerging research university, UTSA continues to remain committed to its original mission of providing affordable, accessible higher education to the people of Texas and beyond. Balancing excellence with access is an imperative that has been embraced by the university community as both a goal and a responsibility.

The university’s growth in student population has been matched by outstanding additions to faculty and to the number of endowed chairs and professorships. In the 2010-2011 academic year, the university had 622 tenured and tenure-track faculty positions and 1,078 non-tenure track faculty and teaching assistants. The university has 36 endowed positions, including 14 distinguished chairs that are endowed at $1 million each.

UTSA is making great strides in the research arena. Research and sponsored program funds totaled more than $70 million in 2010. That same year included many research advances at UTSA. In 2010, the university welcomed Helenita, the world’s most powerful electron microscope, to its Department of Physics and Astronomy. The microscope, manufactured by JEOL USA, has raised global awareness of UTSA and is attracting researchers from around the world. Also, San Antonio-based CPS Energy announced a 10-year, $50 million research initiative with the Texas Sustainable Energy Research Institute, based at UTSA, to position San Antonio as a national leader in green technology research. In October 2010, UTSA received Association for Assessment and Accreditation of Laboratory and Animal Care (AAALAC) International accreditation, elevating its animal research program to the level shared with St. Jude Children’s Research Hospital, the American Red Cross and the National Institutes of Health.

UTSA research is as diverse as its student body. Awards from federal, state and local agencies, as well as private foundations, support a wide range of basic and applied research projects, public service work and training programs.

The university continues to make great research strides in its five areas of research strength: health, energy, security, sustainability, and human and social development. To that end, the university partners with a variety of local research organizations such as the University of Texas Health Science Center San Antonio, Southwest Research Institute®, Texas Biomedical Research Institute, the military, the government and local utilities. The university also maintains research collaborations across the nation and abroad.

UTSA is committed to enabling technology-based economic development in the South Texas region. The university is part of a technology commercialization ecosystem that includes pure, applied and translational research, intellectual property creation and licensing, and company formation, funding, education, staffing and incubation.

The University of Texas at San Antonio is committed to becoming recognized as a national research university, providing access to educational excellence and preparing citizen leaders for the global environment.

The University of Houston is a Carnegie-designated Tier One public research university recognized by The Princeton Review as one of the nation’s best colleges for undergraduate education. One of the nation’s most ethnically diverse research universities, UH has been an integral part of the Houston community for more than 80 years.

More than 38,500 students attend UH’s 12 academic colleges and the multidisciplinary Honors College. The university offers 120 undergraduate majors and minors, and several pre-professional programs leading to careers in medicine, law, pharmacy, energy and more. UH also offers comprehensive programs leading to teacher certification and a five-year, dual-degree program.

Students learn from faculty members who hold the Nobel Peace Prize, the Pulitzer Prize, Tony Awards, the National Medal of Science, and numerous national and international awards for their work in the arts, humanities, sciences, engineering, business, law and social work.

Faculty members conduct more than $100 million in research in such vital areas as superconductivity, space commercialization, biomedical engineering, economics, biological sciences, education and energy exploration. Faculty members and students conduct world-class research through more than 30 research centers and in every academic department. In late 2009 the university made one of its most important physical expansions with the acquisition of the former Schlumberger global headquarters. The 74-acre complex is now home to the UH Energy Research Park, which houses academic and energy-related research programs, administrative operations and third-party tenants with connections to the university. The Energy Research Park is an integral step in becoming the world’s foremost energy university. The university’s research facilities also include the $81 million Science and Engineering Research Center and Classroom Complex, which provides facilities for the many interdisciplinary biomedical research programs that encompass UH Health.

Building on Houston’s global positioning as home to the energy industry capital and the world’s largest and most prestigious medical center, UH Energy and UH Health are two of the university’s most recent research initiatives.

The Law Center has been cited as one of the “best values” in legal education today. The Law Center is the leading law school in the nation’s fifth-largest legal market, and its curriculum is among the broadest offered in the Southwest. Its Institute for Intellectual Property & Information Law is nationally ranked by U.S. News & World Report.
Outstanding academic programs mark every area of study at UH. The Graduate Program in Creative Writing in the department of English is one of the leading cultural institutions in Texas and the Southwest. The program offers poets, fiction writers and non-fiction writers intensive training in both creative writing and literary studies. The Conrad N. Hilton College of Hotel and Restaurant Management is the only program of its kind in Texas. The Hilton College is consistently rated in the top five hospitality programs in the world.

The College of Liberal Arts and Sciences educates tomorrow’s creative artists and performers, economists, historians, journalists, linguists, literary critics, political scientists, psychologists and philosophers. CLASS provides all UH graduates with communication and research skills, cultural awareness and the capacity for sound ethical and aesthetic judgments.

Students in the Moores School of Music consistently place first in regional and national competitions and the American Educational Research Association ranked the College of Education among the top schools in the country in research productivity, with special recognition for the pioneering of innovative technologies for teaching and learning.

Students in the Gerald D. Hines College of Architecture routinely win national and international competitions and the Cullen College of Engineering’s chemical engineering, mechanical engineering, and civil engineering programs are ranked among the top programs in the nation.

More than 3,000 companies recruit Bauer College of Business students each year. Bauer’s Wolff Center for Entrepreneurship ranks as the nation’s best, according to The Princeton Review and Entrepreneur magazine, while its undergraduate program ranks first in Texas for total minority degrees awarded. There are 3,500 UH alumni who currently serve as president/CEO of their company.

The College of Pharmacy has partnered with the U.S. Food and Drug Administration in a cooperative effort unique in the nation, where students will help to develop and exchange scientific resources and educational opportunities. Pharmacy is among several UH colleges and programs listed among the top 10 awarding first professional degrees to Hispanics. Others include: Optometry, Architecture, Business and Marketing, Communications, Psychology and Multi-Interdisciplinary Studies.

The university’s 667-acre campus abounds with parks, fountains, plazas, sculptures, trees and recreational fields, offering all the amenities and high-tech facilities required by modern university life. The campus master plan will add more residence halls and other amenities to transform the campus from a commuter to a residential one.

Last fall, Cougar Village opened its doors to freshmen. The university's newest residential complex offers a housing choice known as “Theme Housing,” which is comprised of floors and wings where students of common interests may choose to live. The Moody Fresh Food Company opened next door. This food-service model is focused on meals being prepared in front of customers and being freshly prepared upon request. Regents recently approved construction of three new projects – Cougar Village Phase II, a sophomore residence hall, and a West Dining Hall – that will energize the west side of campus with student life and move the university toward its goal of becoming a more residential campus. UH also offers Cougar Lofts, loft-style living with an urban feel that provides the convenience of being on campus with the style of city living at its best.

UH’s Welcome Center, where students can find a multitude of services ranging from admissions to financial aid, was completed in 2006. These projects are in addition to the Campus Wellness and Recreation Center, one of the nation’s largest and most advanced facilities of its kind, which was recognized by the National Intramural-Sports Association as one of the most outstanding sports centers in the nation. The Athletics Department at UH is truly world-class, with more than 78 team and individual NCAA championships, and 65 Olympian athletes and coaches earning a collective 39 medals. In June 2010, plans for a new $120 million football stadium and basketball arena renovation were announced, to be constructed on campus.

Complementing the campus offerings is the UH Distance Education program that provides educational opportunities to students in outlying areas. The University of Houston offers the largest university distance education program in Texas.

UH has awarded more than 260,000 degrees, with more than 177,000 alumni residing in the Houston metropolitan area. At the University of Houston, students are prepared to compete in the global marketplace and new knowledge is created to benefit future generations.

THE UNIVERSITY OF TEXAS AT AUSTIN

Main Building, University of Texas at Austin.

Students at the University of Texas at Austin encounter a world of ideas, opportunities and challenges on a campus built upon 125 years of tradition and excellence. The university enrolls about 50,000 students — including about 39,000 undergraduates — from richly varied ethnic and geographic backgrounds — students united in their pursuit of excellence in higher education.

Recognized for its accomplishments in research, teaching, and public service, the university is the flagship of the 15-campus University of Texas System. On a main campus that houses more than 140 buildings on more than 410 acres, students have access to academic centers and programs, archives, museums, and libraries filled with treasures that bring the world to life. Students gaze upon paintings and sculptures in the Blanton Museum (the largest university art museum in the country); thumb through original manuscripts and collections from world-renowned authors, artists, and entertainers at the Harry Ransom Center; relive the turbulent 1960s at the Lyndon B. Johnson Library and Museum; and study prehistoric fossils at the Texas Memorial Museum.
The university's culture of innovation and its position as the hub of the creative community of Austin drive a focus on new ideas, multidisciplinary research and bold innovations. Undergraduate students, including freshmen, are given opportunities to participate in cutting-edge research that results in discoveries that impact people all over the world. One of the advantages of attending a university with such a depth and breadth of resources is the choice from more than 100 majors in 13 undergraduate colleges and schools. The university also maintains research centers across the state that place its faculty and students at the forefront of study in such areas as nanotechnology, robotics, geophysics, astronomy, marine science, business, communication, nursing, history, literature, social sciences, and engineering.

The faculty of UT-Austin is composed of 3,030 professors and lecturers supported by approximately 3,020 assistant instructors and teaching assistants. They include three Pulitzer prize winners (for History in 1967 and 2006 and for Journalism in 1989); 2002 and 2008 Wolf Prize recipients; the 1991 and 2000 National Medal of Science recipients; two recipients of the 2007 National Medal of Technology and Innovation; a recipient of the 2007 A.M. Turing Award; a 2008 and two 2009 Howard Hughes Medical Institute (HHMI) investigators; and the winner of the 1979 Nobel Prize in Physics. The university has 1,258 endowed academic positions – 314 chairs, 523 professorships, 126 lectureships, and 275 fellowships. From the efforts of individual faculty members to the work of 100 organized research units, scholarly inquiry covers a broad range of disciplines, spanning the known universe from the inner workings of atomic nuclei to the far reaches of space.

Every day Texas Exes (alumni of the university) make a difference in their communities as volunteers, teachers, journalists, artists, engineers, scientists, business leaders and lawyers. With world-renowned faculty, top-rated academic programs, successful alumni and such an enticing location, it's no surprise that the University of Texas at Austin ranks among the best universities in the world.

Campus Orientations

Terry Scholars at each of the seven universities gathered on campus in Houston, Austin, College Station, San Marcos, San Antonio, Dallas, and Denton for the Foundation’s annual orientation programs. These events were held in late summer, just prior to the start of the fall 2010 semester.

For new freshmen Scholars, the orientation is designed to focus special emphasis on the challenges faced by first-year college students. The day’s events included presentations on the Foundation Scholarship Program by Board Chair Rhett Campbell and President Ed Cotham. The Scholars also met with members of college administration and with invited guest speakers in the fields of time management and study skills.

In addition, the freshmen Scholars met with representatives of the on-campus Terry Scholar organizations to discuss upcoming campus events, including service and social activities with their fellow Scholars.

At the conclusion of the orientation programs, the new Scholars enjoyed an informal dinner and networking with the upper-class Scholars, who offered mentoring to the new freshmen and tips for a successful first year at college.
Fall Banquets

During October of 2010, Scholars at each of the seven universities were hosted by the Foundation at the annual fall dinners. Foundation Board Members and staff joined the Scholars and university guests in elegant settings for the banquets, held on the campuses in Dallas, San Marcos, Austin, Houston, College Station, San Antonio, and Denton.

Scholars enjoyed dinner and networking with Howard Terry and the Foundation Directors, Scholar Alumni, fellow Scholars, and representatives of the university administration on each campus.

The dinner programs included remarks from Board Chair Rhett Campbell, from the student leaders of the Terry Student Organizations on each campus, and from a guest speaker who had been selected and invited by the Scholars.
2010 Alumni Luncheon

Dallas-area alumni gathered in October for the sixth annual Terry Scholar Alumni Luncheon. Following a tradition of rotating the event to various parts of the state, the 2010 Luncheon returned to Dallas following gatherings in Houston in 2007 and Austin in 2009.

Alumni Scholars from the north Texas area were hosted by the Foundation at Maggiano’s Little Italy at Northpark, where 60 graduates of the scholarship program enjoyed a reunion with members of the Terry Foundation Board of Directors and renewed friendships with former college classmates and recent Scholar Alumni in the Dallas area.

Foundation President Ed Cotham presented a short update on the Foundation’s current operations and highlights of future plans, which include additional Scholar Alumni events.

Bekah Joseph (UT-Dallas 2006) and Sophia Chang (UT-Dallas 2006), 2010 Alumni Luncheon.
2011 Interviews

April of 2011 brought the highlight of the Foundation year, when thirteen interview panels selected 200 new 2011 Scholars. The finalists came from every area of Texas to interviews held concurrently in Austin, Houston, and Dallas, including interviews for the first Texas Tech Scholars, held in Dallas.

Members of the Board of Directors were assisted by 70 Scholar Alumni and current Scholars who served on the selection panels. Over the course of the seven days of interviews, the thirteen panels interviewed a total of 416 finalists nominated by the eight universities.

The Foundation Board of Directors extends special thanks to those Scholars and Alumni Scholars who assisted on the selection panels, with particular appreciation to Advisory Board Members Joseph Dowd (TAMU 1995), Alexis Dixon Johnson (UT-Austin 1994), Meredith Blaschke Reyes (UT-Austin 1997), Ryan Assunto (TAMU 1994), Chad Pinson (UT-Austin 1992), Brian Carroll (UT-Austin 1994), and Tammira Early Philippe (TAMU 1991), who, along with members of the Board of Directors, served as panel chairs.
The Winedale Picnic

The Foundation annual picnic is held at the end of the academic year, usually the last Sunday in April, on the grounds of the Winedale Historical Center near Round Top, Texas. All of the Scholars from each of the participating universities meet together for the only time each year for an informal gathering that honors the graduating senior Scholars.

In 2011, over 650 current Scholars were joined by the Foundation Directors and staff, Alumni Scholars and their families, and special guests from the universities. Catered lunch was followed by the presentation of gifts to the graduating senior Scholars. Following tradition, each Scholar took the microphone to speak briefly of their future plans and then, as a group, honored Howard and Nancy Terry with gifts from each school’s class of senior Scholars.

The 2011 picnic convened under bright sunshine as the Scholars enjoyed the picnic tradition of delicious buffet fare from the grills of Becks Prime Catering of Houston.
THE YEAR IN REVIEW

Terry Foundation
As a young, agile and rapidly growing university, the University of Texas at Dallas attracts an extraordinary combination of student and faculty resources to the vibrant, dynamic and globally connected Dallas-Fort Worth area. Ranked by Kiplinger’s as one of the top 100 best values among public universities, UT Dallas’ relatively brief existence (42 years) has been committed to the pursuit of excellence and the steadfast determination to maintain the highest standards of quality.

Students seeking the close-knit community of a small university and the reputation and resources of a big one find the perfect balance at UT Dallas. With an enrollment of more than 17,000, UT Dallas offers all the benefits of a small campus: excellent student/faculty ratios and a diverse yet intimate community where every student has a voice. However, UT Dallas is also backed by the powerful UT System and is strategically aligned with other institutions to offer advanced research and other exciting opportunities traditionally found at larger institutions.

UT Dallas’ research in a variety of fields, especially in engineering and the biomedical sciences, has gained national attention. Special support is available to undergraduates who wish to conduct their own research, much of which is carried out in UT Dallas’ specialized research centers. Among these are:

- The Cybersecurity and Emergency Preparedness Institute, which works to address issues of homeland security, emergency and disaster response, and cybercrime.
- The Callier Center for Communication Disorders, which provides state-of-the-art diagnostics and treatment for hearing, speech and language disorders. Its graduate program in audiology is ranked fourth in the nation by U.S. News & World Report.
The Alan G. MacDiarmid NanoTech Institute is at the forefront of understanding and exploiting the nanoscale, with such discoveries as hydrogen-powered artificial muscles that are one hundred times stronger than human muscles.

Excellence in research is only logical for UT Dallas, which originated as a science and engineering research facility before it became a university in 1969. These roots have fostered a culture that values innovation and advancement, embraces change and encourages multidisciplinary study. A prime example of this legacy is the university’s Natural Science and Engineering Research Laboratory, designed to be one of the most revolutionary research facilities in the nation. The four-story, 192,000-square-foot laboratory supports interdisciplinary collaborations in fields as diverse as chemistry, biology, physics, electrical engineering and materials science.

Beyond the laboratory, the UT Dallas School of Management was ranked 22nd among the nation’s top business schools by U.S. News & World Report in its first-ever survey of part-time MBA programs. U.S. News also included the school’s full-time program in 24th place among public universities. The School of Arts and Humanities’ arts and technology program merges fine arts and computer science, and is included in The Princeton Review’s list of the top 10 graduate programs for video game design. These excellent and wide-ranging academic programs have attracted outstanding faculty, including a Nobel laureate and members of the National Academy of Sciences and the National Academy of Engineering, and are a magnet for the state’s top students. UT Dallas’ entering freshman class also has one of the highest average SAT scores among public universities in Texas.

UT Dallas is not limited by adherence to tradition, and its students are not bound by pre-set academic paths or narrow silos of study. They are free to customize their degree plans or choose from an array of multidisciplinary programs. Many students choose UT Dallas based on its academic excellence and grow to love the way they become an integral part of a lively intellectual and social community.

Spacious apartment-style housing is located conveniently on campus, and in fall 2009 the campus completed its first 148,000-square-foot residence hall. The first hall was so popular that a second, identical structure is being built adjacent to the original hall. The second hall is planned for occupancy in fall 2011. The residence halls include Living Learning Communities, garden courtyards, large communal spaces and a variety of leisure, sports and recreational areas.

A unique institution of extraordinary quality and excellence, the University of Texas at Dallas has set new standards for creative innovation in Texas universities, and, with the same enthusiasm and energy that so distinctively marked its past, the university faces a brighter and even more exciting future.

Located at the heart of campus, "Old Main" has long been the symbol of Texas State University-San Marcos.

Texas State University-San Marcos is a doctoral granting university located in the burgeoning Austin–San Antonio corridor, where it is the largest campus in the Texas State University System and one of the largest in the state.

Texas State’s 32,586 students choose from nearly 200 undergraduate, master’s and Ph.D. degree programs offered by seven colleges – Applied Arts, the McCoy College of Business Administration, Education, Fine Arts and Communication, Health Professions, Liberal Arts, and Science and Engineering.

Authorized by the Texas Legislature in 1899, Southwest Texas State Normal School opened its doors in 1903. Over the years the Legislature broadened the institution’s scope and changed its name, in succession, to Normal College, Teachers College, College, University, and in 2003 to Texas State University-San Marcos. Each name reflects the university’s growth from a small teacher preparation institution to a major, multipurpose university. Texas State’s original mission was to prepare Texas public school teachers, especially those of south central Texas. It became renowned for carrying out this mission, but today it does far more.

As the university’s student population has grown – from 303 in 1903 to more than 32,000 in 2011 – the campus, too, has expanded. The original 11-acre main campus has grown to 429 acres, plus an additional 4,200 off-site acres in ranching, farming and a recreational camp. Major acquisitions include the 79-acre San Marcos Baptist Academy campus in 1978, the 90-acre Aquarena Springs Resort in 1994, the 125-acre University Camp on the Blanco River in 1951, and the 3,485-acre Freeman Ranch in 1985.
Located on the edge of the Texas Hill Country where blackland prairies turn into beautiful hills, Texas State enjoys a setting that is unique among Texas universities. The beauty of the crystal-clear San Marcos River and the stately cypress and pecan trees on the campus add to the charm of its picturesque setting. The campus is in San Marcos, a community about halfway between Austin and San Antonio. Its location on the banks of the San Marcos River provides recreational and leisure activities for students throughout the year.

Texas State is nationally recognized for excellence in many academic disciplines. The Geography Department has been ranked the largest and one of the best programs in the nation for many years by the American Association of Geographers. Faculty members in geography, communication studies, business, mathematics and mass communication have been recognized as the best in the nation in their fields. Eighteen faculty members have been honored as Piper Professors, an annual recognition of the top college faculty in the state.

Student teams in debate, advertising and free enterprise routinely place high in national competitions. The Students in Free Enterprise (SIFE) team won the international competition in 2000 against 700 teams from 15 countries and has placed among the top 20 for eight straight years. The American Advertising Federation student team claimed its second national title win in 2005.

Texas State students in jazz, marching and concert band, symphony, choirs, instrumental ensembles, mariachis and steel drum band maintain schedules of performances across the state and the world. The jazz program has been featured for years at the Montreux (Switzerland) Jazz Festival. The sound recording technology program, housed at Texas State’s unique Fire Station Studio, is the only degree program of its kind in the Southwest.

With a diverse campus community including more than 26 percent of the student body from ethnic minorities, Texas State is one of the top 13 producers of Hispanic baccalaureate graduates in the nation. Texas State also operates a campus in Round Rock, offering several programs in the greater north Austin area. Texas State opened the St. David’s School of Nursing at the Round Rock campus in the fall of 2010.

The university has granted well over 100,000 degrees over the years. Alumni include Lyndon B. Johnson, Class of 1930, making Texas State the only Texas institution – and one of only 29 colleges nationwide – to have graduated an American president. Texas State alumni have become leaders in business, education, entertainment, media, literature, the military, law enforcement, government, agriculture, technology, science, sports, law and health care.

TAMU President Dr. Bowen Loftin and Foundation President Ed Cotham. 2010 TAMU Banquet.

UT-San Antonio Scholars with Founder Howard Terry (center, front) and representatives of UT-San Antonio and the Foundation. 2010 UT-San Antonio Banquet.
Texas A&M University, the Lone Star State’s first public institution of higher learning, is a leader nationally in providing high-quality education, research and service. It is one of a select few universities with triple federal mandates to provide land-grant, sea-grant and space-grant service to the nation. With an enrollment approaching 50,000, Texas A&M has the seventh-largest student body in the country, but it is still noted for its friendly environment – with campus visitors, as well as campus “regulars,” frequently welcomed with “howdy” greetings.

In addition to its 5,200-acre College Station campus, one of the largest in the nation, Texas A&M operates a marine-oriented branch campus in Galveston and an engineering-oriented branch campus in the Persian Gulf state of Qatar (with operation of that campus fully funded by Qatar Foundation for Education, Science and Community Development). It also operates centers in Italy, Costa Rica and Mexico for study-abroad.

Through its 10 colleges, Texas A&M offers more than 120 undergraduate degrees, more than 240 master’s and doctoral degrees, and one professional degree – the Doctor of Veterinary Medicine.

Although Texas A&M’s student body is one of the nation’s largest, its student-to-faculty ratio is less than 20:1. Average SAT scores are considerably higher than the national average – 1210 for freshmen entering in fall 2010 – and the university ranks among the nation’s top-10 leaders in enrolling National Merit Scholars. Also, the university enrolls more than 4,500 international students representing approximately 120 countries, and it sends more than 1,200 students on study-abroad programs each year.

Texas A&M historically has led the state in student retention and graduation rates overall, as well as for African-American and Hispanic students. More than a quarter of all entering freshmen
are the first in their families to attend college. To help reach these students and others who might not otherwise be considering a college education, Texas A&M operates eight Prospective Student Centers in key locations across the state.

Leadership development outside the classroom is an important part of the Texas A&M experience. More than 75 percent of Aggies belong to at least one of the university's 800-plus student-led clubs and organizations. One of the endeavors that makes Texas A&M unique is Fish Camp, the largest freshman orientation program in the nation, with upperclassmen donating their time and paying their own expenses to provide incoming freshmen the opportunity to meet at an East Texas encampment and gain valuable insight into what to expect during their college careers and, in many cases, make lifelong friends.

Although military training has not been mandatory at Texas A&M since 1963, between 1,800 and 2,000 young men and women choose to participate in the university's Corps of Cadets each year. The corps consistently commissions more military officers than any institution in the nation except the service academies, but students choose to be in the corps for its leadership development opportunities and its legendary camaraderie.

Texas A&M now has an annual investment in research of more than $630 million - placing it among the top 20 universities nationally - and involving hundreds of faculty engaged in an array of projects that include fundamental studies as well as endeavors with significant economic potential. As one of the benefits of attending a top research university, Texas A&M undergraduate and graduate students have opportunities to participate in a wide variety of scholarly research projects and experiments.

The 2,800-plus faculty includes recipients of the Nobel Prize, National Medal of Science, Wolf Prize and other top national and international awards, with 24 holding membership in the prestigious National Academy of Sciences or the National Academy of Engineering. In recognition of its faculty and academic and research programs, Texas A&M holds membership in the prestigious American Association of Universities and is home to one of the nation's largest chapters of Phi Beta Kappa, the oldest and most respected undergraduate honor society in the nation.

More than $800 million in campus construction is under way, in the planning stage or recently completed. Opened within the past two years are a $100 million interdisciplinary life sciences building, two state-of-the-art buildings for physics and astronomy, an award-winning facility housing the Texas Institute for Preclinical Studies and a new multi-story building for the Texas Transportation Institute, as well as major new facilities in support of agricultural and engineering. A new arts and humanities building and a renovated and expanded memorial student center are in advanced stages of construction, and plans have been announced for a new underpass to better connect east and west campuses.

Texas A&M's College Station campus is virtually in the center of the Houston–Dallas/Fort Worth–Austin/San Antonio triangle and within 200 miles of 19 million of the state's 23 million citizens. The university is the home for the George Bush Presidential Library and Museum, which annually attracts thousands of visitors from throughout the nation and brings an array of nationally and internationally prominent speakers to the campus for the benefit of the university's students, faculty, staff and others.

The Texas A&M Foundation, which is located on campus, manages one of the largest university endowments in the nation for the benefit of Texas A&M's academic and related programs. Also located on campus is the headquarters for The Association of Former Students, the university's alumni organization that serves some 400,000 former students through a network of about 330 chartered alumni clubs worldwide. The Association, through its giving program, provides more than $3 million annually for student scholarships and financial aid, faculty enrichment and other campus-based programs.

TAMU Scholar Victor Garcia and Founder Howard Terry. 2011 Winedale Picnic.
ABOUT THE FOUNDERS

Howard L. Terry

Native Texan Howard L. Terry was born in Milam County in 1916. He attended the University of Texas at Austin on an athletic scholarship and earned his B.B.A. in 1938. He was employed by Procter & Gamble until 1942, when he entered the U.S. Navy and served as a P.T. Boat commander in the Pacific during World War II. He later returned to Procter & Gamble, from which he was recruited to set up a chain of appliance stores, serving as General Manager until 1951. At that time, Mr. Terry went into business for himself in lumber, building, and development, building several residential subdivisions in Texas and other states.

Over the following years, Mr. Terry founded several businesses in various fields, including Business Funds, Marathon Manufacturing, Crutcher Resources, Allied Bancshares, and Farm & Home Savings. Beginning in 1979, he became a director and chairman of the executive committee of Penn Central Corp., a position he held until 1986. In 1981, he founded the Terry Companies, a multi-state corporation involved in oil & gas exploration and development.

Howard and Nancy Terry are both longtime residents of Houston, Texas. Mr. Terry still maintains regular office hours in the Foundation offices and is actively involved in the operations of the Terry Companies and the Foundation. Despite his series of remarkable successes in business endeavors in many fields, he often refers to the Terry Foundation as his finest achievement.

Nancy M. Terry

Nancy Terry is a native of New York State, born in Ogdensburg on the St. Lawrence River. She attended the School of Nursing at the University of Rochester, New York, where her hobbies included snow skiing, ice skating, swimming and antique collecting. She subsequently relocated to Texas and for over forty years has been married to Howard L. Terry, with whom she founded the Terry Foundation in 1986.

While no longer able to be active at Foundation events, Mrs. Terry follows from home her continued interest in the Foundation and the Terry Scholars.
Rhett Campbell, Foundation Board Chair

Rhett Campbell served on the original Board of Directors of the Terry Foundation and has worked closely with Howard and Nancy Terry in the management and direction of the Foundation since its inception in 1986. He was named Board Chair in 2000.

Rhett is chair of the bankruptcy section of the Thompson & Knight law firm, where his areas of specialization include civil trial and business bankruptcy. He was a founding member in 1977 of the Houston law firm of Morris & Campbell, where he practiced until 2001. He holds both a B.A. (with high honors) and J.D. (with honors) from Southern Methodist University, where he was honored as a Hatton Sumners Scholar and as a member of Phi Beta Kappa, Order of the Coif, and Order of Barristers.

Rhett is married to Houston native Susie Seybold. They have three children and one grandchild and reside in Houston.

Edward T. Cotham Jr., President

Ed Cotham serves as President of the Terry Foundation, where he assists Howard Terry in the management of the Foundation endowment portfolio and serves as chief operating officer of the Foundation. In 1993, he was named President of Terry Petroleum Company. Prior to joining Terry Petroleum, Ed practiced law with the Morris & Campbell law firm in Houston.

Ed holds an undergraduate degree in Economics from the University of Houston and a master’s degree in Economics from the University of Chicago. A native Texan, Ed returned to complete a law degree from the University of Texas at Austin.

Ed is a nationally recognized expert on Civil War history and has authored three books on military history. He and his wife, Candy, have one son and reside in Houston.

John W. Storms

John Storms has served on the Foundation Board of Directors since its inception in 1986. John is the Managing General Partner of Storms & Critz, Certified Public Accountants, of Houston. John also serves on the boards of other business entities and is an active member of the board of Child Advocates, Inc. of Houston.

John is a Certified Public Accountant and holds a B.B.A. from the University of Texas at Austin and an M.B.A. in taxation from the City University of New York.

John and his wife, Charlene, reside in Houston and have two daughters and five grandchildren.
R. Carter Overton III
Carter Overton has served on the Foundation Board of Directors since its inception in 1986. Carter is the President of Overton Energy LLC, a Houston-based management and investment company engaged in direct investment in U.S. oil and gas exploration and production. He worked previously for Terry Petroleum Company, where he served as Vice President of Operations. Carter is a past Chairman of the Texas Business Hall of Fame Foundation and is actively involved in his community and the River Oaks Baptist Church.
A native Houstonian, Carter received both his B.B.A. and his M.B.A. from the University of Texas at Austin.
Carter has two daughters, Josephine and Sophia, and resides with his wife, Elaine, in Houston, Texas.

Yvonne Rode Moody
Yvonne Rode Moody was one of the first Terry Scholars, a member of the original class in 1987. She was named to the Foundation Board in 2000, one of the first Alumni Scholars to be named to the Board.
A native of Fredericksburg, Yvonne received a B.S. in Mechanical Engineering from Texas A&M in 1991. She worked for eight years with Chevron as Construction Project Manager for the Houston Retail Marketing Group. Yvonne and her husband, Ted, live in San Antonio, where she now works full-time as mom to their two daughters, in occasional substitute teaching, and in many volunteer activities.

Jim Davis
Jim Davis, FSA is the Managing Principal for the Southern U.S. Employee Benefits Practice of Milliman, covering thirteen states. He is also an actuary and retirement consultant.
A native of Quitman, Texas, Jim became a Terry Scholar in 1989. He graduated from the University of Texas at Austin in 1993, where he received a B.A. in Economics (with highest honors). He also holds a master's degree from Southern Methodist University.
Jim was named to the Foundation Board of Directors in 2000. He lives with his three daughters in Sunnyvale, Texas, a suburb of Dallas.

Jeffrey C. Stichler
Jeff Stichler is an Associate Principal in the Conroe ISD. He was named to the Foundation Board in 2006, one of two new Scholar Alumni members named to the Board that year.
A native of Fort Stockton, Texas, Jeff was named a Terry Scholar at Texas A&M in 1990, where he graduated in 1995 with a B.S. in Kinesiology and a minor in History. He holds a Masters of Education degree from Sam Houston State University. Prior to his position in administration, Jeff taught advanced mathematics and coached for 11 years, seven years of which were at Conroe's Caney Creek High School, where he was named Teacher of the Year and District Swim Coach of the Year.
Jeff lives in Conroe with his wife, Melanie, and their two children.

Gayle Stinson
Gayle Stinson was named to the Foundation Board in 2006, one of two new Scholar Alumni members named to the Board that year.
Gayle is Superintendent of Schools for the Lake Dallas ISD in north Texas. She served for six years in administration for the Texarkana Independent School District, where her outstanding tenure as principal of Texas High School resulted in her selection as Principal of the Year by the Texas Association of Secondary School Principals. Gayle was named a 2007 Outstanding Young Texas Ex by the University of Texas at Austin.
A native of Redwater, Texas, Gayle was one of the first Terry Scholars at the University of Texas at Austin, a member of the original class of 1987. She completed her B.S. in 1991 and subsequently earned an M.S. in Education from Texas A&M at Texarkana.
Gayle and her husband, Trent, reside with their three children in Hickory Creek, Texas.

FOUNDATION STAFF

Pictured with Founder Howard Terry and President Ed Cotham are staff members Jamie Thyssen, Brandy N. Skillern, Beth Freeman (Director of Scholar Relations), and (standing) Becky Adams, Laura L. Sanders, and Robert L. Parker (Vice President-Administration).
Foundation Advisory Board

In 2008, the Board of Directors approved the formation of the Terry Foundation Advisory Board. Recognized by the Board for their professional achievements and commitment to the Foundation, a group of thirty-two outstanding Scholar Alumni were selected who assist the Board in an advisory role and at Foundation events throughout the year around the state.

The Foundation Advisory Board: (seated) Casie Kaluza Wenmohs, Kerry Keiser Ugarte, Director Yvonne Rode Moody, Ryan Assunto, Gayle Cerrato Hanz, Tammin Early Philippe, Abby Howell, Director Jeff Stichler, Wes Migura, Gregg Knaupe and Kathy Davis Duggan with (standing) Joseph Dowd, Board Chair Rhett Campbell, Allison Beckworth Readinger, Bob Gabriel, Chad Pinson, Jessica Scott, Brian Carroll, Ray Kerlick, President Ed Cotham, Brian Yarbrough, Susie Buck Hawthorne, Nellson Burns, Garth Beinart, and Meredith Blaschke Reyes. 2009 Austin Alumni Luncheon.

University of Texas at Austin, 1988
2003 Terry Scholar Jessica M. Fertitta died on February 20, 2011 in a tragic automobile accident near her hometown in Beaumont, Texas. She was a second year law student at the University of Texas in Austin.

Jessica graduated in 2007 from the University of Texas at Austin with a BA degree in Political Communications and Business Foundations, completing her degree with a cumulative 4.0 GPA. As a senior Terry Scholar in the spring of 2007, Jessica served on a Foundation Scholar Selection Committee in Houston.

Jessica will be remembered by her fellow Scholars at UT-Austin as a brilliant student and a dynamic leader. She served in leadership positions all of her life – notably as President of her senior class at Monsignor Kelly High School and later as President of the UT-Austin Panhellenic Council. While in school, she interned in the Texas State Senate and worked for four years in the office of Texas Attorney General Greg Abbott.

Jessica had a presence of warmth and grace. She was very kind, generous with her heart, and a friend to many. She inspired those around her with her courage, resilience, energy, compassion and optimism.

The Terry Foundation honors her memory, just as she honored the Foundation and the University of Texas at Austin in her outstanding scholarship, leadership and example. She will be missed by all who knew her.
