The 2011-2012 Terry Foundation Annual
is dedicated to Founder
Howard L. Terry
November 27, 1916 – April 20, 2012
On April 20, 2012, the Foundation and the State of Texas lost one of its brightest beacons when Howard L. Terry died. Founder of the Terry Foundation, Howard Terry led the organization personally for twenty-five years, developing and growing his proudest accomplishment to become the largest private source of college scholarships in the state. Howard Terry’s legacy in the lives of the thousands of Terry Scholars is incalculable, impacting families and universities state wide for decades in the past – and decades to come.

It is difficult to fathom the scope of Howard Terry’s contributions to the lives of Texas’ brightest young stars: 2,800 Terry Scholars named since the Foundation was founded in 1986, with over $100 million invested in the educations of these young Texans. Mr. Terry’s generous philanthropy and personal commitment to helping others have changed not only the futures of the Terry Scholars and their families, but also the landscape of access to higher education across the state. The impact of those contributions is his most noble and enduring legacy, an extraordinary testament to Mr. Terry’s belief in passing onto others the help that one has received.
Success began with a plan, hard work, and help from others.

Howard Terry's long and successful life is not easily captured in a few pages and photos. However, any talk about Mr. Terry would not be complete without talking about football. Growing up in the small town of Cameron, Texas, he played football for C.H. Yoe High School. Mr. Terry had dreams of becoming a successful businessman, but he knew that he could only achieve these dreams with the help of a college education, which he knew would be possible only with financial assistance—hopefully earned with a football scholarship.

At first, Mr. Terry's college football career did not seem destined for success. Although he worked out for a couple of college teams, he did not receive a single scholarship offer. Running out of options, Mr. Terry received help from an unexpected source. Realizing that the young man was not getting the break that he deserved, one of Howard Terry’s high school science teachers called a friend who worked for a sporting goods company in Austin. The store contact made an appointment for the UT coach to drop by his store to meet with young Terry. The science teacher drove Terry to Austin, where he had a 30 minute interview with Coach Jack Chevigny.

Chevigny was a former Notre Dame star who had taken the head coaching job at the University of Texas. As Mr. Terry recalled the interview, “Coach Chevigny did most of the talking. He told me stories of his playing days under Knute Rockne. I remember thinking that he must not have many good football players, because at the end of that interview he made me an offer to come to the University without ever having seen me play.”

The offer involved what today would be called “work-study.” He spent his first year working a couple of hours each day doing odd jobs, like cleaning out the gym and cutting the grass. Freshmen did not play varsity football in those days, but by his sophomore year
Two notable events occurred after the remarkable UT/Baylor game in 1937, the first of which launched a UT tradition that continues to this day.

At the conclusion of the game, the recently completed UT Tower was illuminated, for the very first time, with a colorful show of lights to celebrate the Longhorn victory and honor the team. Today, victorious Longhorn teams are still honored with similar light shows projected onto the Tower.

The second event involved Mr. Terry personally. Around the time of the UT/Baylor game, the sporting news community initiated a new practice of recognizing the nation’s outstanding college football team each week. Originally called the “Grantland Rice Huskies Award,” the trophy was presented to a team and its captain for “outstanding excellence on the field of sport.” UT and Mr. Terry were the second recipients of this award. Today, the Grantland Rice Trophy is better known in its current form: the crystal football given each year to the college football team that wins the national championship.

Terry had worked his way up to a starting position. Mr. Terry remembers being complimented by the coach one day after practice. “He told me I had played well. I told him I could play even better if I didn’t have to work two hours a day. The coach laughed and said I didn’t have to do that anymore.” And he didn’t.

Terry quickly became a featured player on the UT team as a guard on offense and a linebacker on defense. It was not unusual for him to play 60 minutes per game. By his senior year in 1937, Terry had become one of the leaders of the team. But the UT team for which he was playing had not achieved a great deal of success. The preceding season they had won only two games. A new coach, “D.X.” Bible, was brought in to turn the Texas team around. Bible, a football legend, was a no-nonsense man who started the process of rebuilding the UT football program.

As the UT team approached its seventh game of the 1937 season, the Longhorns knew they faced a real challenge in a difficult environment. Their scheduled opponent, Baylor, had won every game so far and seemed poised to play in the Rose Bowl and contend for a national title. The game was being played in Waco and was scheduled for national radio coverage. Few who followed the game gave UT (a 16 point underdog) any realistic chance of being competitive in the game, let alone winning it.

In those days, the team did not have a permanent captain. Instead, the coach simply watched how the players practiced and appointed a player to be captain for the next week. As luck would have it, Howard Terry was picked to be the captain for the coming game with heavily-favored Baylor. As he later reported, “I remember Coach Bible taking me aside during one practice and telling me the importance of getting the guys ready to play. We talked about the lineup and I offered a couple of suggestions for changing the lineup. These were guys that I knew could play but simply hadn’t given their maximum effort. The coach went along with my proposed changes. I then went to work getting those guys cranked up to play.”
The strategy worked. The game turned out to be close. Every time Baylor made a play, Texas countered. Texas had put their biggest lineman in the middle of the line to stop the Baylor running attack, leaving Howard Terry, as linebacker, free to rush the quarterback from different angles. “I was a pretty fast guy in those days and got after the quarterback a lot during that game. Today we would call it blitzing. It kept the quarterback off balance and as a result we held them pretty good on defense.”

As time wound down in the fourth quarter, UT kicked what turned out to be the winning field goal. Texas had shocked the nation by beating Baylor 9-6. As one newspaper described it the next day, “it was a game that proved beyond any shadow of a doubt that nothing is impossible in football, that ability doesn’t mean everything and that fighting spirit, the determination to do or die, does mean everything. Believe the 10,000 fans who saw this bewildering masterpiece of the Southwest’s traditional upset magic, the Longhorns played a game worthy to be written into the University of Texas’ most honored athletic annals.” Howard Terry, the captain of the team, was singled out for special recognition after the stunning victory. Calling him the “finest leader the Longhorns have ever had,” the Austin newspaper noted that he “threw himself into every play with fierce abandon.” Texas Longhorns Football eventually named Mr. Terry to the all-decade team for his leadership and play.

Leadership skills learned on the football field would eventually translate into every aspect of Howard Terry’s life.

When World War II came, Mr. Terry volunteered for service with the Navy. The Navy soon realized that the crew on board a PT Boat was very similar in size to a football team. So, men with football backgrounds were often chosen to be officers on board these small craft. Howard Terry was eventually shipped off to the South Pacific and became Captain of PT-326. In the fall of 1944, Terry and his vessel became part of the fleet that invaded the Philippines. Mr. Terry actually watched as
Gen. Douglas MacArthur waded ashore, fulfilling his famous vow to return. A couple of days later, Mr. Terry’s PT Boat was involved in the Battle of Leyte Gulf, an action in which the PT Boats courageously took on some of the largest warships in the history of the world. It was an extremely dangerous time for Mr. Terry, and he could vividly recall how lucky he had been to survive the Philippines campaign.

When Mr. Terry returned to civilian life after the war he set about developing the business career of which he had always dreamed. He had a natural gift for finance and gradually built an empire of businesses in the fields of construction, banking, real estate, and oil and gas. On one occasion, Mr. Terry was on the Board of Directors of Penn Central Corporation. That company’s management decided to make an acquisition of which Mr. Terry did not approve. He decided to take his campaign directly to the shareholders and requested a formal shareholder vote. All of the conventional wisdom on Wall Street told him he had no chance of winning. No one in American corporate history, they warned, had ever succeeded in winning a proxy fight.

"Good," he said, "this will be the first." He went all around the country seeing every large shareholder who would let him in the door. And when the dust had settled and the votes were counted, Mr. Terry had won.

If there seems to be a pattern in this narrative thus far, it is possibly because these early successes are reflective of Howard Terry’s tenacious personal drive.
Howard Terry’s entire life was about accomplishing things that seemed difficult or impossible. It was about dreaming big dreams and then making them come true.

The end of one particularly significant business deal in Mr. Terry’s career was marked by a gift of gold pens to those among his team who had achieved success in the face of challenge. Today, the same penchant for rewarding perseverance in the face of adversity can be seen in the Terry Foundation’s practice of rewarding senior Terry Scholars with gold pens.

**Contemplating the helping hands that fostered his own success, Mr. Terry commits himself to passing along similar help to others.**

As he approached 70, Mr. Terry started thinking about what to do with the substantial financial resources he and his wife, Nancy, had accumulated. They discussed many options but they always returned to the one thing that had started Mr. Terry along the road to success – his scholarship to college.

Eventually, the Terrys decided to devote their efforts to creating a foundation that would serve all the people of Texas, providing scholarships to deserving students who, like Mr. Terry himself, would otherwise have been unable to fulfill their dreams.

The Terry Foundation, founded in 1986, became, in Howard Terry’s own words, “the most important thing I’ve ever done.” Over the years, he and Mrs. Terry led its expansion from 17 students in fall 1987 to over 700 students in fall 2012. Originally sponsoring Scholars at only two universities, the program has expanded over the years to eight universities.

Howard Terry’s later years were involved principally in the management of the Foundation endowment and program. He kept regular office hours until the end of his life and, on special occasions, would join the staff in attendance at Foundation-sponsored events on the campuses, where wide-eyed Terry Scholars invariably greeted him with respect and delight.

Howard Terry’s final days were marked with the same dedication that defined his life. On the day before he died, he worked a full day in the Foundation offices, where he met with staff and planned scholarships for the 2012-2013 academic year. On Friday, April 20th, he awoke complaining of mild chest discomfort and was transported to the Texas
Medical Center, where he died shortly after admittance. Just as he had always predicted and intended, he was able to work up to the very last day of his life.

Howard Terry’s memorial service was held on Wednesday, April 25th at the River Oaks Country Club in Houston. The Terry family was joined by the Foundation Board and staff, countless Terry Scholars and Scholar Alumni, and some of Houston’s long-time community leaders in a crowd that was estimated to be in excess of 1,000 people. Foundation President Ed Cotham delivered the eulogy, which was followed by tributes from members of the Terry family and moving remarks on behalf of the Terry Scholars from Board Member Yvonne Rode Moody.
It is interesting to consider the return on the actual cost of the college scholarship that Mr. Terry received in 1934—total room, board, and tuition was probably less than $500. In evaluating how that scholarship has been repaid ($100 million to date), it may well be the greatest investment that any entity affiliated with the State of Texas has ever made.

Eschewing brick and mortar, the Terrys instead sought to make the success of deserving young Texans, and their impact on the state, the Terry legacy.

Howard Terry was not a fan of public recognition. He repeatedly declined to place his name on buildings or other “bricks & mortar.” However, despite his legendary personal humility and sometimes over his objection, Howard Terry’s life and contributions have been honored over the years with notable acknowledgements. In 1999, Mr. Terry was named a Distinguished Alumnus of the University of Texas at Austin. In 2010, the Terry Foundation scholarship program was named the National Scholarship Program of the Year. Just prior to his death in 2012, Howard and Nancy Terry were honored by the Texas A&M Foundation with the Sterling C. Evans Medal, the highest honor the A&M Foundation awards. No other non-Texas A&M graduate has ever received this medal.

It is likely that every Terry Scholar who studies Mr. Terry’s life will identify with his personal story. Like each of the Terry Scholars, Mr. Terry went through a 30 minute interview that literally changed his life. Because of people who helped him and believed in him, Mr. Terry was able to obtain a college education. In college, he learned that leadership is not about fancy titles or popularity.
Sometimes it is just about working hard and inspiring others to do the same. Most of all, it is about not giving up. What looked like just another losing football season in 1937 turned into a lighted tower and an enduring honor for Howard Terry. That spirit and dream is his legacy for the thousands of Terry Scholars all over the world – and for the Terry Scholars still to come.

It is with admiration and grateful thanks that the Foundation bids a bittersweet and fond farewell to its Founder and namesake. The impact of his life on future generations will be the only monument that he wanted – and richly deserves.

Howard Terry. TAMU campus, 2011.

Howard and Nancy Terry with family and friends. UT-Austin campus, 1999.
“Success is the attainment of the goals you’ve set for yourself in life.”
— Howard L. Terry

The Terry Foundation’s goal is to improve and develop the State of Texas by assisting Texas students to attend the state’s finest public universities. The Foundation hopes that these students will have a significant impact on the future leadership of the state and nation. To achieve this goal, the Foundation awards scholarships to students who meet the high standards set by the Founders.

What began in 1986 as a small scholarship program is now the state’s largest private source of scholarships for the University of Texas at Austin, Texas A&M University, the University of Houston, Texas State University-San Marcos, the University of Texas at San Antonio, the University of Texas at Dallas, the University of North Texas, and Texas Tech University, with over 700 Terry Scholars enrolled. But its origin was neither large nor legendary — it was as humble and low-profile as the Founders whose name it bears.

The Terry Scholarship Program was born of a desire of Howard and Nancy Terry to help young people to help themselves. A longtime resident of Houston, Howard Terry had been active for many years in banking, construction, real estate and oil and gas. With profound business success over the decades and their family’s needs met, the Terrys developed a growing desire to give back to the community and, specifically, to help young people to reach their goals in higher education.

In 1986, the Terrys began considering a variety of options in their desire to make a lasting contribution to the future of Texas higher education. After evaluating ideas as varied as university campus construction projects and endowed-chair faculty positions, the Terrys were still not satisfied. Knowing that universities are more than buildings and classrooms, Howard Terry had repeatedly declined to allow the universities to honor his previous contributions by placing his name on campus structures: “Mortar and bricks will eventually be torn down,” he reasoned. The Terrys believed, in the long term, that a university — like the state it represents — is only as good as the educated citizens it produces. Thus was born a desire to invest in the students who would attend the public colleges and universities in Texas.

The Terrys’ desire to help young people was influenced greatly by Howard Terry’s own college experience: he had attended the University of Texas on an athletic scholarship, becoming captain of the football team and graduating in 1938. His family origins in Cameron, Texas were modest and it was only through the generosity of others that his college education had been made possible. Mr. Terry never forgot the helping hand that he had received in attending college and was determined to extend that same help to a new generation of students.

After seeking counsel from sources that included former UT-Austin coach Darrell Royal (an original Foundation Board Member) and Houston attorney Rhett Campbell (Board Member since inception and now Board Chair), the Terrys determined that their most lasting contribution would be through a perpetual endowment that would provide college scholarships for students who had demonstrated the capacity to become outstanding future leaders and who needed financial assistance to achieve their goals in higher education. From this simple concept, the Terry Foundation was created in 1986 to be the source of a perpetual scholarship program.
The first scholarship recipients, known since then as “Terry Scholars,” were selected at interviews held in the spring of 1987. That original class of seventeen 1987 Scholars was joined in the 1988-1989 academic year by seventeen additional recipients. Over the years, the number of Scholars selected has increased, with the most recent spring 2012 interviews having resulted in the selection of 213 new freshmen Scholars. These recipients will join the upper-class Scholars to number 711 Terry Scholars enrolled for the 2012-2013 academic year.

During the first seventeen years of the Foundation’s history, Scholars attended only the University of Texas at Austin or Texas A&M University. In the fall of 2004, the Foundation Scholarship Program expanded for the first time, when Terry Scholars were named at the University of Houston and at Texas State University-San Marcos. Additional growth provided scholarships in 2006 at the University of Texas at Dallas and the University of Texas at San Antonio, and again in 2010 at the University of North Texas in Denton and in 2011 at Texas Tech University in Lubbock. Strategic future plans call for the program’s ultimate expansion to other public universities in Texas.

Since its inception, the Terry Scholarship Program has assisted over 2,800 Texas college students to achieve their goals in higher education. The Foundation Board oversees a large endowment and now includes four members who are Terry Scholar Alumni. The program was honored in 2010 by the National Association of Scholarship Providers in being named National Scholarship Provider of the Year. Chartered to exist into perpetuity, the Foundation is designed to continue in the future to add scholarships each year.

Howard Terry was active in the management of the Foundation up until the very end of his long life when he died in 2012 at age 93. Nancy Terry, while no longer able to participate in Foundation events, continues to follow with interest the scholarship program that bears their name. It has become larger than they ever imagined, fulfilling in the process their dreams of making a difference in the lives of students across the state. Despite his extraordinary success in ventures that made the Terry Foundation possible, Howard Terry observed that “the Terry Foundation is the most important thing I’ve done in my life, because it’s enabled me to help more people than I would have ever been able to help otherwise.”
THE TERRY SCHOLARSHIP PROGRAM

Criteria

The Terry Foundation awards scholarships to Texas high school seniors who have been accepted for admission to the University of Texas at Austin, Texas A&M University at College Station, the University of Houston, Texas State University-San Marcos, the University of Texas at San Antonio, the University of Texas at Dallas, North Texas State University in Denton, or Texas Tech University in Lubbock. To be selected to receive a scholarship, potential Terry Scholars must demonstrate academic excellence, leadership and financial need.

Terry Scholars are distinguished by a deep-rooted desire to enrich the general welfare of the community and an established record of leadership. In order to select Scholars with the greatest potential for success, the Foundation’s selection committees focus on candidates with a demonstrated history of involvement in activities, outstanding scholastic achievement and a well-rounded personality marked by a desire to succeed.

Nominations for Terry Scholarship awards are accepted only from the designated offices at the eight universities affiliated with the Foundation. Nominations are not accepted from any other source.

The Selection Process

Each year in April, the Terry Foundation announces the new class of Terry Scholars after an intensive two-step selection process. Early each spring, the universities nominate candidates from the freshman class that will matriculate the next fall. In selecting nominations, the universities adhere to the criteria established by the Foundation.

While the numbers of nominations and subsequent scholarships have grown substantially since the first scholarships were awarded in 1987, the process to win a scholarship has remained highly competitive. In selecting finalists, the selection committees at the affiliated universities are limited to a small fraction of the thousands of applications received.

The Foundation administration invites the finalists to formal interviews conducted each spring concurrently in Austin, Houston and Dallas. Finalists meet with a six-member panel consisting of members of the Foundation Board of Directors, Alumni Scholars and current Terry Scholars. The interview panels make the final selections and new Scholars are notified prior to May 1st of the interview year.

In April 2012, the fourteen interview panels met with 447 finalists for the final selection process. Of those finalists, 213 were selected for Terry Scholarship Awards.
The Stipend

The Terry Scholarship Award holds the potential to be a four-year stipend. Initially, the scholarship is awarded for a Scholar's first year of college and is renewed annually at the discretion of the Board of Directors. In order to continue as a Terry Scholar, a student must maintain a cumulative GPA of 2.5, meet the requirements for mandatory attendance at specific Terry Foundation events and fulfill other reporting requirements.

The amount of the stipend is based on the cost of attendance at the universities, including tuition, fees, books, on-campus room and board and miscellaneous expenses. The actual specific amount of the stipend will vary for each Scholar, depending on other scholarship awards and the ability of the Scholar's family to contribute to the cost of college. Over the years, the average amount of the stipends has increased each year due to increases in cost of living and tuition.

The Terry Foundation seeks to provide adequate financial support for each Terry Scholar so that students may concentrate on academics and college-related activities, without having to incur debt to finance their education. In addition, the Scholarship Program is designed to eliminate the need for Scholars to work during the college years.

Funding

The Terry Scholarship Program is funded by the earnings of a substantial endowment that has been provided solely by the Founders and is managed by the Terry Foundation. The Foundation is chartered to exist into perpetuity and anticipates additional growth based on incremental endowment by the Founders and their estate.

CUMULATIVE TOTAL NUMBER OF TERRY SCHOLARS
Campus Orientations

Terry Scholars at each of the eight universities gathered on campus in Houston, Austin, College Station, San Marcos, San Antonio, Dallas, Denton, and Lubbock for the Foundation’s annual orientation programs. These events were held in late summer, just prior to the start of the fall 2011 semester.

For new freshmen Scholars, the orientation is designed to focus special emphasis on the challenges faced by first-year college students. The day’s events included presentations on the Foundation Scholarship Program by Board Chair Rhett Campbell and President Ed Cotham. The Scholars also met with members of college administration and with invited guest speakers in the fields of time management and study skills.

In addition, the freshmen Scholars met with representatives of the on-campus Terry Scholar organizations to discuss upcoming campus events, including service and social activities with their fellow Scholars.

At the conclusion of the orientation programs, the new Scholars enjoyed an informal dinner and networking with the upper-class Scholars, who offered mentoring to the new freshmen and tips for a successful first year at college.
Fall Banquets

During October of 2011, Scholars at each of the eight universities were hosted by the Foundation at the annual fall dinners. Members of the Foundation Board of Directors and staff joined the Scholars and university guests in elegant settings for the banquets, held on the campuses in Dallas, San Marcos, Austin, Houston, College Station, San Antonio, Denton, and Lubbock.

Scholars enjoyed dinner and networking with Howard Terry and the Foundation Directors, Scholar Alumni, fellow Scholars, and representatives of the university administration on each campus.

The dinner programs included remarks from Board Chair Rhett Campbell, from the student leaders of the Terry Student Organizations on each campus, and from a guest speaker who had been selected and invited by the Scholars.
2011 Alumni Luncheon

Houston-area alumni gathered in November for the seventh annual Terry Scholar Alumni Luncheon. Following a tradition of rotating the event to various parts of the state, the 2011 Luncheon returned to Houston following gatherings in Austin in 2009 and Dallas in 2010.

Alumni Scholars from the greater Houston area were hosted by the Foundation at Maggiano’s Little Italy near the Houston Galleria, where 67 graduates of the scholarship program enjoyed a reunion with Howard Terry, members of the Terry Foundation Board and staff, and former college classmates and recent Scholar Alumni in the Houston area.

Foundation President Ed Cotham presented a short update on the Foundation’s current operations and highlights of future plans, which include additional Scholar Alumni events.

Advisory Board member Meredith Blaschke Reyes (UT-Austin 1997) and Founder Howard Terry. 2011 Alumni Luncheon.

Director Jeff Stichler (TAMU 1990) and Jacob Setterbo (UT-Austin 2001). 2011 Alumni Luncheon.

2012 Interviews

April of 2012 brought the highlight of the Foundation year, when fourteen interview panels selected 213 new 2012 Scholars. The finalists came from every area of Texas to interviews held concurrently in Austin, Houston, and Dallas.

Members of the Board of Directors were assisted by 77 Scholar Alumni and current Scholars who served on the selection panels. Over the course of the seven days of interviews, the fourteen panels interviewed a total of 447 finalists nominated by the eight universities.

The Foundation Board of Directors extends special thanks to those Scholars and Alumni Scholars who assisted on the selection panels, with particular appreciation to Advisory Board members Wes Migura (TAMU 1988), Amanda Carlson Donohoe (UT-Austin 1987), Alexis Dixon Johnson (UT-Austin 1994), Meredith Blaschke Reyes (UT-Austin 1997), Jessica Scott (TAMU 1993), Chad Pinson (UT-Austin 1992), Brian Carroll (UT-Austin 1994), Garth Beinart (UT-Austin 1993), and Elizabeth Riley Keeler (TAMU 1992), who, along with members of the Board of Directors, served as panel chairs.

Scholar Alumnus Matt Priest (Texas State 2004), Scholar Rachel Hawkins (Texas State 2008), Scholar Alumna Bonnie Cole Southerland (Texas State 2004), Scholar Noel Fuller (Texas State 2008), Scholar Alumna Katie Ellis Luevano (Texas State 2004) and Panel Chair and Director Yvonne Rode Moody (TAMU 1987). 2012 Austin Interviews.

Scholar Alumnae Talia Gaetke (UH 2004), Denise Burell (Texas State 2006), Kathryn Flowers (UT-Austin 2007) seated, with Advisory Board Member and Panel Chair Wes Migura (TAMU 1988), Scholar Alumna Chris Wurtz (TAMU 1997) and Foundation President Ed Cotham. 2012 Dallas Interviews.

Founder Howard Terry with Advisory Board Members Ray Kerlick (UT-Austin 1987) and Panel Chair Garth Beinart (UT-Austin 1993), Scholars Lance Hansen (TAMU 2008) and Mallory Brandenburg (TAMU 2008), Scholar Alumna Scott Evans (UT-Austin 1990), Maria Garnett (TAMU 2006), Advisory Board Member and Panel Chair Elizabeth Riley Keeler (TAMU 1992), Scholars Emily Ellett (UT-Austin 2008) and Johnny Sompholphusty (UT-Austin 2008), Scholar Alumnus Abby Howell (TAMU 2000), K.K. Kellar Eschbach (TAMU 2004) and Justin Thompson (UT-Austin 1997). 2012 Houston Interviews.

The Spring Picnics

For twenty-three years, the Foundation had celebrated the end of the academic year with a spring picnic on the grounds of the Winedale Historical Center near Round Top, Texas. All of the Scholars from each of the participating universities have met together for the only time each year for an informal gathering that honors the graduating senior Scholars.

In 2012 for the first time, the Foundation hosted two picnics: one at the traditional site at Winedale and a new Picnic North event held in Dallas, designed to facilitate attendance by Scholars and Alumni and their families in the north Texas area.

Both 2012 picnics were marked by heartfelt memorials from the Scholars honoring the Founder Howard Terry, whose death had occurred only weeks earlier.

Scholars were joined at each location by the Foundation Directors and staff, Alumni Scholars and their families, and special guests from the universities. Catered lunch was followed by the presentation of gifts to the graduating senior Scholars. Following tradition, each Scholar took the microphone to speak briefly of their future plans.
THE YEAR IN REVIEW

UH Scholar Shelley Temple adds a flower to the arrangement honoring Howard L. Terry. 2012 Winedale Picnic.

UH Scholar Tammy Ngo accompanies the rose ceremony in honor of Howard L. Terry. 2012 Winedale Picnic.

UH Assistant Dean of the Honors College Jodie Koszegi and UH Scholar Ashley Chiarelli. 2012 Winedale Picnic.

Scholar Alumnae Baeleigh Carson (Texas State 2007) and Kiana Davis (Texas State 2007). 2012 Winedale Picnic.

UNT Scholars Dillon South, Chris James and JaRod Hull. 2012 Picnic North.

TERRY FOUNDATION
Texas A&M University, the Lone Star State’s first public institution of higher learning, is a leader nationally in providing high-quality education, research and service. It is, in fact, one of a select few universities with triple federal mandates to provide land-grant, sea-grant and space-grant service to the nation. With an enrollment approaching 50,000, Texas A&M has the seventh-largest student body in the country, but it is still noted for its friendly environment — with campus visitors, as well as campus “regulars,” frequently welcomed with “howdy” greetings.

In addition to its 5,200-acre College Station campus, one of the largest in the nation, Texas A&M operates a marine-oriented branch campus in Galveston and an engineering-oriented branch campus in the Persian Gulf state of Qatar (with operation of that campus fully funded by Qatar Foundation for Education, Science and Community Development). It also operates centers in Italy, Costa Rica and Mexico for study-abroad and other educational opportunities as well as for research and service endeavors.

Through its 10 colleges, Texas A&M offers more than 120 undergraduate degrees, more than 240 master’s and doctoral degrees, and one professional degree — the Doctor of Veterinary Medicine.

Although Texas A&M’s student body is one of the nation’s largest, its student-to-faculty ratio is approximately 20:1. Average SAT scores are considerably higher than the national average — 1210 for freshmen entering in fall 2010 — and the university ranks among the nation’s top-10 leaders in enrolling National Merit Scholars. Also, the university enrolls more than 4,500 international students representing approximately 120 countries, and it sends more than 1,200 students on study-abroad programs each year.

Texas A&M historically has led the state in student retention and graduation rates overall, as well as for African-American and Hispanic students. More than a quarter of all entering freshmen are the first in their families to attend college. To help reach these
students and others who might not otherwise be considering a college education, Texas A&M operates eight Prospective Student Centers in key locations across the state.

Leadership development outside the classroom is an important part of the Texas A&M experience. More than 75 percent of Aggies belong to at least one of the university’s 800-plus student-led clubs and organizations. One of the endeavors that makes Texas A&M unique is Fish Camp, the largest freshman orientation program in the nation, with upperclassmen donating their time and paying their own expenses to provide incoming freshmen the opportunity to meet at an East Texas encampment and gain valuable insight into what to expect during their college careers and, in many cases, make lifelong friends.

Although military training has not been mandatory at Texas A&M since 1963, between 1,800 and 2,000 young men and women choose to participate in the university’s Corps of Cadets each year. The corps consistently commissions more military officers than any institution in the nation except the service academies, but students choose to be in the corps for its leadership development opportunities and its legendary camaraderie.

Texas A&M now has an annual investment in research of more than $630 million, placing it among the top 20 universities nationally, and involving hundreds of faculty engaged in an array of projects that include fundamental studies as well as endeavors with significant economic potential. As one of the benefits of attending a top research university, Texas A&M undergraduate and graduate students have opportunities to participate in a wide variety of scholarly research projects and experiments.

The 2,800-plus faculty includes recipients of the Nobel Prize, National Medal of Science, Wolf Prize and other top national and international awards, with 24 holding membership in the prestigious National Academy of Sciences, or the National Academy of Engineering. In recognition of its faculty and academic and research programs, Texas A&M holds membership in the prestigious American Association of Universities and is home to one of the nation’s largest chapters of Phi Beta Kappa, the oldest and most respected undergraduate honor society in the nation.

More than $800 million in campus construction is under way, in the planning stage or recently completed. Opened within the past two years are a $100 million interdisciplinary life sciences building, two state-of-the-art buildings for physics and astronomy, an award-winning facility housing the Texas Institute for Preclinical Studies and a new multi-story building for the Texas Transportation Institute, as well as major new facilities in support of agricultural and engineering. A new arts and humanities building and a renovated and expanded memorial student center are in advanced stages of construction, and plans have been announced for a new underpass to better connect east and west campuses.

Texas A&M’s College Station campus is virtually in the center of the Houston–Dallas/Fort Worth–Austin/San Antonio triangle and within 200 miles of 19 million of the state’s 23 million citizens. The university is the home for the George Bush Presidential Library and Museum, which annually attracts thousands of visitors from throughout the nation and brings an array of nationally and internationally prominent speakers to the campus for the benefit of the university’s students, faculty, staff and others.

The Texas A&M Foundation, which is located on campus, manages one of the largest university endowments in the nation for the benefit of Texas A&M’s academic and related programs. Also located on campus is the headquarters for The Association of Former Students, the university’s alumni organization that serves some 400,000 former students through a network of about 330 chartered alumni clubs worldwide. The Association, through its giving program, provides more than $3 million annually for student scholarships and financial aid, faculty enrichment and other campus-based programs.

Texas State University-San Marcos is an emerging research university located in the burgeoning Austin–San Antonio corridor, where it is the largest campus in the Texas State University System and one of the largest in the state.

Texas State's 34,113 students choose from nearly 200 undergraduate, master's and Ph.D. degree programs offered by the following colleges: Applied Arts, the McCoy College of Business Administration, Education, Fine Arts and Communication, Health Professions, Liberal Arts, Science and Engineering, the University College and the Graduate College.

Authorized by the Texas Legislature in 1899, Southwest Texas State Normal School opened its doors in 1903. Over the years the Legislature broadened the institution's scope and changed its name, in succession, to Normal College, Teachers College, College, University, and in 2003 to Texas State University-San Marcos. Each name reflects the university's growth from a small teacher preparation institution to a major, multipurpose university. Texas State's original mission was to prepare Texas public school teachers, especially those of south central Texas. It became renowned for carrying out this mission, but today it does far more.

As the university's student population has grown – from 303 in 1903 to more than 34,000 in 2012 – the campus, too, has expanded. The original 11-acre main campus has grown to 429 acres, plus an additional 4,200 off-site acres in ranching, farming and a recreational camp. Major acquisitions include the 79-acre San Marcos Baptist Academy campus in 1978, the 90-acre Aquarena Springs Resort in 1994, the 125-acre University Camp on the Blanco River in 1951, and the 3,485-acre Freeman Ranch in 1985.
Located on the edge of the Texas Hill Country where blackland prairies turn into beautiful hills, Texas State enjoys a setting that is unique among Texas universities. The beauty of the crystal-clear San Marcos River and the stately cypress and pecan trees on the campus add to the charm of its picturesque setting. The campus is in San Marcos, a community about halfway between Austin and San Antonio. Its location on the banks of the San Marcos River provides recreational and leisure activities for students throughout the year.

Texas State is nationally recognized for excellence in many academic disciplines. The Geography Department has been ranked the largest and one of the best programs in the nation for many years by the American Association of Geographers. Faculty members in geography, communication studies, business, mathematics and mass communication have been recognized as the best in the nation in their fields. Eighteen faculty members have been honored as Piper Professors, an annual recognition of the top college faculty in the state.

Student teams in debate, advertising, and free enterprise routinely place high in national competitions. The Students in Free Enterprise (SIFE) team won the international competition in 2000 against 700 teams from 15 countries and has placed among the top 20 for eight straight years. The American Advertising Federation student team claimed its second national title win in 2005.

Texas State students in jazz, marching and concert band, symphony, choirs, instrumental ensembles, mariachis and steel drum band maintain schedules of performances across the state and the world. The jazz program has been featured for years at the Montreux (Switzerland) Jazz Festival. The sound recording technology program, housed at Texas State's unique Fire Station Studio, is the only degree program of its kind in the Southwest.

With a diverse campus community including more than 28 percent of the student body from ethnic minorities, Texas State is classified as a Hispanic Serving Institution and is one of the top 13 producers of Hispanic baccalaureate graduates in the nation. Texas State also operates a campus in Round Rock, offering several programs in the greater north Austin area. Texas State opened the St. David's School of Nursing at the Round Rock campus in the fall of 2010.

The university has granted well over 100,000 degrees over the years. Alumni include Lyndon B. Johnson, Class of 1930, making Texas State the only Texas institution – and one of only 29 colleges nationwide – to have graduated an American president. Texas State alumni have become leaders in business, education, entertainment, media, literature, the military, law enforcement, government, agriculture, technology, science, sports, law and health care.

There is no better place to be right now than Texas Tech University. Not since the university was founded in 1923 has there been such opportunity or momentum. Graduate and undergraduate enrollments are at record levels. Total research expenditures topped $140 million this year, up from about $50 million in 2008. Our faculty and students are winning international acclaim. We are recruiting and hiring top-flight faculty in a variety of disciplines. Our goal is simple: become one of the nation’s great research universities.

Texas Tech has the distinction of being the largest comprehensive higher education institution in the western two-thirds of the state and serves a region larger than 46 of the nation’s 50 states. A major research university with the feel of a smaller liberal arts institution, Texas Tech’s enrollment of more than 32,000 allows students to have one-on-one interactions with top faculty in a safe, traditional campus atmosphere.

The university offers more than 150 bachelor’s degrees, 100 master’s degrees and 50 doctoral degree choices. Plus, as part of the Texas Tech University System, Texas Tech shares the same campus with its sister university the Texas Tech University Health Sciences Center. The close proximity makes Texas Tech the only institution in the state with undergraduate and graduate schools, a law school and medical school all on the same campus, which facilitates the transition to professional studies.

A strong art and music program is balanced with growing research in a number of sustainable energy areas. New areas of research in solar and nuclear energies as well as smart grids and storage are supported by major endowed chairs. Texas Tech researchers are
also known for their work in creative and technical writing, food safety, environmental toxicology and wind science.

Texas Tech students come from nearly every county in Texas, almost every state in the Union and more than 100 countries. Our students study on our own campus in Seville, Spain and participate in programs in more than 80 countries. They win prestigious, nationally competitive scholarships such as the William J. Fulbright, Gates-Cambridge, and Barry M. Goldwater Scholarships and are known for national academic championships in chess, animal sciences, debate and law.

Texas Tech is proud to boast one of the finest and most diverse faculties in the nation. Our faculty members excel in teaching, research and service, as well as winning prestigious national awards. For example, this year, three faculty members received CAREER awards from the National Science Foundation. These awards recognize the brightest and most promising young faculty from across the nation. Our Phi Beta Kappa chapter, which received the highest possible rating for 2008-2009 from the national Phi Beta Kappa Society, further demonstrates the superior education available here.

Community engagement plays an important role at Texas Tech. In 2006, the university was one of the first 62 institutions in the country to earn the Carnegie Foundation’s classification for Community Engagement. In 2007 and 2008 the university was named to the Corporation for National and Community Service President’s Higher Education Community Service Honor Roll. In 2009, more than 197,000 individuals participated in TTU community partnerships and activities; 118,000 of these were K-12 students and teachers.

Texas Tech is home to the Lubbock Lake Landmark, an internationally known archeological site; the Texas Tech Museum, which is accredited by the American Association of Museums; Texas Tech University Press; the Maedgen Theatre, home to Texas Tech University’s Department of Theatre and Dance productions; and the Moody Planetarium.

The university is located in Lubbock, Texas – a thriving city of 218,000 people that is the economic and medical center of a 26-county region. While Lubbock has maintained a rich agricultural heritage with cotton remaining the major crop with 2-3 million bales produced annually, it has become a major retail and medical center for the Texas South Plains and Eastern New Mexico.

Lubbock has a rich quality of life with varied music and cultural venues. The Lubbock Symphony Orchestra recently celebrated its 50th anniversary. Ballet Lubbock and the Lubbock Chorale also thrive in the city along with an annual Arts Festival that brings visitors from across the region. The Underwood Center for the Arts and numerous small galleries and community theatre groups anchor a strong arts and theatre scene.

The University of Houston is a Carnegie-designated Tier One public research university recognized by The Princeton Review as one of the nation’s best colleges for undergraduate education. One of the nation’s most ethnically diverse research universities, UH has been an integral part of the Houston community for more than 80 years.

About 40,000 students attend UH’s 12 academic colleges and the multidisciplinary Honors College. The university offers 120 undergraduate majors and minors, and several pre-professional programs leading to careers in medicine, law, pharmacy, energy and more. UH also offers comprehensive programs leading to teacher certification and a five-year, dual-degree program.

Students learn from faculty members who hold the Nobel Peace Prize, the Pulitzer Prize, Tony Awards, the National Medal of Science, and numerous national and international awards for their work in the arts, humanities, sciences, engineering, business, law and social work.

Faculty members conduct more than $100 million in research in such vital areas as superconductivity, space commercialization, biomedical engineering, economics, biological sciences, education, and energy exploration. Faculty members and students conduct world-class research through more than 30 research centers and in every academic department. In late 2009 the university made one of its most important physical expansions with the acquisition of the former Schlumberger global headquarters. The 74-acre complex is now home to the UH Energy Research Park, which houses academic and energy-related research programs, administrative operations, and third-party tenants with connections to the university. The Energy Research Park is an integral step in becoming the world’s foremost energy university.

The university’s research facilities also include the $81 million Science and Engineering Research Center and Classroom Complex, which provides facilities for the many interdisciplinary biomedical research programs that encompass UH Health. Building on Houston’s global positioning as home to the energy industry capital and the world’s largest and most prestigious medical center, UH Energy and UH Health are two of the university’s most ambitious research initiatives.

The Law Center has been cited as one of the “best values” in legal education today. The Law Center is the leading law school in the nation’s fifth-largest legal market, and its curriculum is among the broadest offered in the Southwest. Its Institute for Intellectual Property & Information Law is nationally ranked by U.S. News & World Report.

Outstanding academic programs mark every area of study at UH: the Graduate Program in Creative Writing in the department...
of English is one of the leading cultural institutions in Texas and the Southwest. The program offers poets, fiction writers and non-fiction writers intensive training in both creative writing and literary studies. The Conrad N. Hilton College of Hotel and Restaurant Management is the only program of its kind in Texas. The Hilton College is consistently rated in the top five hospitality programs in the world.

The College of Liberal Arts and Sciences educates tomorrow’s creative artists and performers, economists, historians, journalists, linguists, literary critics, political scientists, psychologists and philosophers. CLASS provides all UH graduates with communication and research skills, cultural awareness and the capacity for sound ethical and aesthetic judgments.

Students in the Moores School of Music consistently place first in regional and national competitions and the American Educational Research Association ranked the College of Education among the top schools in the country in research productivity, with special recognition for the pioneering of innovative technologies for teaching and learning.

Students in the Gerald D. Hines College of Architecture routinely win national and international competitions, and the Cullen College of Engineering’s chemical engineering, mechanical engineering, and civil engineering programs are ranked among the top programs in the nation.

More than 3,000 companies recruit Bauer College of Business students each year. Bauer’s Wolff Center for Entrepreneurship ranks as the nation’s best, according to The Princeton Review and Entrepreneur magazine, while its undergraduate program ranks first in Texas for total minority degrees awarded. There are 3,500 UH alumni who currently serve as president/CEO of their company.

The College of Pharmacy has partnered with the U.S. Food and Drug Administration in a cooperative effort unique in the nation, where students will help to develop and exchange scientific resources and educational opportunities. Pharmacy is among several UH colleges and programs listed among the top 10 awarding first professional degrees to Hispanics. Others include: Optometry, Architecture, Business and Marketing, Communications, Psychology and Multi-Interdisciplinary Studies.

The university’s 667-acre campus abounds with parks, fountains, plazas, sculptures, trees and recreational fields, offering all the amenities and high-tech facilities required by modern university life. The campus master plan will add more residence halls and other amenities to transform the campus from a commuter to a residential one.

Cougar Village, the university’s newest residential complex, offers a housing choice known as “Theme Housing,” which is comprised of floors and wings where students of common interests may choose to live. The Moody Fresh Food Company operates next door. This food-service model is focused on meals being prepared in front of customers and being freshly prepared upon request. Three new construction projects – Cougar Village Phase II, a sophomore residence hall and a West Dining Hall – are energizing the west side of campus with student life and moving the university toward its goal of becoming a more residential campus. UH also offers Cougar Lofts, loft-style living with an urban feel that provides the convenience of being on campus with the style of city living at its best.

UH’s Welcome Center, where students can find a multitude of services ranging from admissions to financial aid, was completed in 2006. Ground was broken recently on a spectacular addition and transformation of the University Center, strengthening its role as the center of student activity, services and recreation on campus. These projects are in addition to the Campus Wellness and Recreation Center, one of the nation’s largest and most advanced facilities of its kind, recognized by the National Intramural-Sports Association as one of the most outstanding sports centers in the nation. The Athletics Department at UH is world-class, with more than 78 team and individual NCAA championships, and 65 Olympian athletes and coaches earning a collective 39 medals. A new stadium parking garage has opened next to Robertson Stadium, which will be demolished at the end of the 2012 football season, to be replaced with a Tier One stadium in which to play Big East football.

Complementing the campus offerings is the UH Distance Education program that provides educational opportunities to students in outlying areas. UH is the largest university distance education program in Texas.

The University of Houston generates $1.3 billion annually in the regional economy. Up to 80 percent of UH graduates remain in the Houston area. UH is a great university that a great city deserves. It strives to educate the enlightened leaders and to prepare the productive citizens that our community must have to prevail. Just as the city of Houston prospers in the energy industry, in health care fields, and in the arts and humanities, this university works diligently to reflect and reinforce these successes. We are partners in progress as the University of Houston travels toward overall excellence.

During its rich 120-year history, the University of North Texas has progressed from a private normal school to a large, comprehensive public research university with 12 colleges and schools offering 97 bachelor's, 88 master's, and 40 doctoral degree programs, many nationally and internationally recognized.

The flagship of the UNT System, UNT is the leading university in the North Texas region and an important driver for the country’s sixth-largest economy. With more than 36,000 students, UNT ranks 33rd nationally in enrollment among all four-year public universities and is among the largest universities in Texas.

Known for its comprehensiveness, UNT is a diverse institution that is furthering its impact in science, engineering and nanotechnology while building on its foundation in the arts, education and business. As a university at the forefront of change, UNT provides a broad-based, student-focused education powered by award-winning faculty who unleash students’ potential and advisors and mentors who help guide and keep them on track in earning their degrees.

The more than 7,900 students who graduate from UNT each year join the university’s more than 326,000 living alumni who already are transforming the world. The university boosts the regional economy by more than $1.3 billion annually, and UNT alumni boost the area’s economy by more than $10 billion annually.

The university has been named one of America’s 100 Best College Buys for 15 consecutive years and offers the quality of a private university at an affordable cost. It is listed as a “Best in the West” college by The Princeton Review.
UNT attracts students from all walks of life – from students who are the first in their family to earn a degree to those who transfer to the university to complete their educational journey. UNT is among the top 50 universities in the nation for the number of undergraduate degrees awarded to ethnic minority students, who account for more than one-third of the university student body. Among public universities, UNT ranks first in Texas and fourth nationally for the enrollment of transfer students.

The university’s diverse population includes nearly 2,000 international students who come from every corner of the world, and UNT students hone their worldviews through a global-minded education steeped in an appreciation of other cultures and study abroad. UNT is one of the top producers of doctoral graduates in Texas, and it plays a critical role in keeping the state’s industries vibrant and competitive while contributing to the global knowledge base.

Samantha McMillan, Suzanne Hengst, David DeAndrea, Scholar Alumnus Fahad Firoze (UT-Dallas 2008), and Kalyn Hanson. 2011 UT-Dallas Banquet.

Students at the University of Texas at Austin encounter a world of ideas, opportunities and challenges on a campus built upon 125 years of tradition and excellence. The university enrolls about 50,000 students – including about 39,000 undergraduates – from richly varied ethnic and geographic backgrounds – students united in their pursuit of excellence in higher education.

Recognized for its accomplishments in research, teaching, and public service, the university is the flagship of the 15-campus University of Texas System. On a main campus that houses more than 140 buildings on more than 410 acres, students have access to academic centers and programs, archives, museums, and libraries filled with treasures that bring the world to life. Students gaze upon paintings and sculptures in the Blanton Museum (the largest university art museum in the country); thumb through original manuscripts and collections from world-renowned authors, artists, and entertainers at the Harry Ransom Center; relive the turbulent 1960s at the Lyndon B. Johnson Library and Museum; and study prehistoric fossils at the Texas Memorial Museum.
The university’s culture of innovation and its position as the hub of the creative community of Austin drive a focus on new ideas, multidisciplinary research and bold innovations. Undergraduate students, including freshmen, are given opportunities to participate in cutting-edge research that results in discoveries that impact people all over the world. One of the advantages of attending a university with such a depth and breadth of resources is the choice from more than 100 majors in 13 undergraduate colleges and schools. The university also maintains research centers across the state that place its faculty and students at the forefront of study in such areas as nanotechnology, robotics, geophysics, astronomy, marine science, business, communication, nursing, history, literature, social sciences, and engineering.

The faculty of UT-Austin is composed of 3,030 professors and lecturers supported by approximately 3,020 assistant instructors and teaching assistants. They include three Pulitzer prize winners (for History in 1967 and 2006 and for Journalism in 1989); 2002 and 2008 Wolf Prize recipients; the 1991 and 2000 National Medal of Science recipients; two recipients of the 2007 National Medal of Technology and Innovation; a recipient of the 2007 A.M. Turing Award; a 2008 and two 2009 Howard Hughes Medical Institute (HHMI) investigators; and the winner of the 1979 Nobel Prize in Physics. The university has 1,258 endowed academic positions – 314 chairs, 523 professorships, 20 visiting professorships, 126 lectureships, and 275 fellowships. From the efforts of individual faculty members to the work of 100 organized research units, scholarly inquiry covers a broad range of disciplines, spanning the known universe from the inner workings of atomic nuclei to the far reaches of space.

Every day Texas Exes (alumni of the university) make a difference in their communities as volunteers, teachers, journalists, artists, engineers, scientists, business leaders and lawyers. With world-renowned faculty, top-rated academic programs, successful alumni and such an enticing location, it’s no surprise that the University of Texas at Austin ranks among the best universities in the world.

As a young, agile and rapidly growing university, the University of Texas at Dallas attracts an extraordinary combination of student and faculty resources to the vibrant, dynamic and globally connected Dallas-Fort Worth area. Ranked by Kiplinger’s as one of the top 100 best values among public universities, UT Dallas’ relatively brief existence (43 years) has been committed to the pursuit of excellence and the steadfast determination to maintain the highest standards of quality.

Students seeking the close-knit community of a small university and the reputation and resources of a big one find the perfect balance at UT Dallas. With an enrollment of more than 19,000, UT Dallas offers all the benefits of a small campus: excellent student/faculty ratios and a diverse yet intimate community where every student has a voice. However, UT Dallas is also backed by the powerful UT System and is strategically aligned with other institutions to offer advanced research and other exciting opportunities traditionally found at larger institutions.

UT Dallas’ research in a variety of fields, especially in engineering and the biomedical sciences, has gained national attention. Special support is available to undergraduates who wish to conduct their own research, much of which is carried out in UT Dallas’ specialized research centers. Among these are:

- The Cybersecurity and Emergency Preparedness Institute, which works to address issues of homeland security, emergency and disaster response, and cybercrime.
- The Callier Center for Communication Disorders, which provides state-of-the-art diagnostics and treatment for hearing, speech and language disorders. Its graduate program in audiology is ranked fourth in the nation by U.S. News & World Report.
The Alan G. MacDiarmid NanoTech Institute is at the forefront of understanding and exploiting the nanoscale, with such discoveries as hydrogen-powered artificial muscles that are one hundred times stronger than human muscles.

Excellence in research is only logical for UT Dallas, which originated as a science and engineering research facility before it became a university in 1969. These roots have fostered a culture that values innovation and advancement, embraces change and encourages multidisciplinary study. A prime example of this legacy is the University’s Natural Science and Engineering Research Laboratory, designed to be one of the most revolutionary research facilities in the nation. The four-story, 192,000-square-foot laboratory supports interdisciplinary collaborations in fields as diverse as chemistry, biology, physics, electrical engineering and materials science.

Beyond the laboratory, the UT Dallas Naveen Jindal School of Management was ranked 37th among the nation’s top business schools by U.S. News & World Report in 2012. U.S. News also included the school’s full-time MBA program in 12th place among public universities. The School of Arts and Humanities’ arts and technology program merges fine arts and computer science, and was included in The Princeton Review’s list of top 10 graduate programs for video game design in 2011. These excellent and wide-ranging academic programs have attracted outstanding faculty, including a Nobel laureate and members of the National Academy of Sciences and the National Academy of Engineering, and are a magnet for the state’s top students. UT Dallas’ entering freshman class also has one of the highest average SAT scores among public universities in Texas.

UT Dallas is not limited by adherence to tradition, and its students are not bound by pre-set academic paths or narrow silos of study. They are free to customize their degree plans or choose from an array of multidisciplinary programs. Many students choose UT Dallas based on its academic excellence and grow to love the way they become an integral part of a lively intellectual and social community.

Spacious apartment-style housing is located conveniently on campus, and in fall 2009 the campus completed its first 148,000-square-foot residence hall. The first hall was so popular that a second, identical structure was built adjacent to the original hall. A third hall is currently under construction. The residence halls include Living Learning Communities, garden courtyards, large communal spaces and a variety of leisure, sports and recreational areas.

A unique institution of extraordinary quality and excellence, the University of Texas at Dallas has set new standards for creative innovation in Texas universities, and, with the same enthusiasm and energy that so distinctively marked its past, the University faces a brighter and even more exciting future.

Chris Ruppert and Sam Parnell. 2011 UT-Austin Orientation.
The University of Texas at San Antonio is the third-largest academic institution in the prestigious University of Texas System. Located in the seventh-largest city in the nation and second-largest city in Texas, the university has become the regional center for higher education, reflected in more than 50 percent growth in enrollment over the last decade.

Created by the Texas Legislature in 1969, UTSA enrolled its first students in 1973. In its short history, the university has grown to enrollment of nearly 31,000 students and three campuses: the Main Campus in northwest San Antonio with more than 30 buildings for teaching, research and student life on 725 acres; the Downtown Campus with four buildings on 18 acres; and the HemisFair Park Campus, home of the Institute of Texan Cultures, a museum with 45,000 square feet of exhibit space and five recreation Texas frontier structures.

UTSA serves more students than any other higher education institution in South Texas, offering 135 degree programs in eight colleges: College of Architecture, College of Business, College of Education and Human Development, College of Engineering, College of Liberal and Fine Arts, College of Public Policy, College of Sciences and Honors College. Master’s and doctoral degree programs are coordinated through the Graduate School with 13 percent of UTSA students enrolled in graduate programs.

As the region’s largest generator of engineers, artists, business professionals, teachers, scientists and technology managers, UTSA has produced more than 90,000 alumni since awarding its first degrees in August 1974.

The university’s campuses provide access and opportunity for numerous historically underserved students. More than 60 percent of UTSA’s students come from groups underrepresented in higher education, and many are the first in their families to attend a college or university.

Outside of the classroom, students can choose from more than 280 student organizations. UTSA’s Recreation Center boasts the tallest indoor rock-climbing wall at a Texas college. The university also offers students on-campus housing and an expanded University Center.

In 2008, the University of Texas Board of Regents granted the university permission to expand athletics with the addition of an NCAA Division I football program. In 2009, the university hired Larry Coker, who led the University of Miami to a national championship in 2001, as the Roadrunners founding head football
coach. UTSA played its first football game in the Alamodome on September 3, 2011, with record-breaking NCAA opening-game attendance of 56,743 and record-breaking average home-game attendance of 35,521. In 2012, the Roadrunners will join the Western Athletic Conference. UTSA’s NCAA Division I program has a winning legacy of nearly 60 conference championships since its inception in 1981.

As an emerging research university, UTSA is committed to providing affordable, accessible higher education to the people of Texas and beyond. Balancing excellence with access is an imperative embraced by the university community as both a goal and a responsibility.

The university’s growth in student population has been matched by outstanding additions to faculty and to the number of endowed chairs and professorships. In the 2011-2012 academic year, the university had 614 tenured and tenure-track faculty positions and 821 non-tenure track faculty and teaching assistants. The university has 39 endowed positions including 15 distinguished chairs, each endowed at $1 million or more.

UTSA is making great strides in the research arena. Research and sponsored program funds totaled more than $70 million in 2011. In 2010, the university acquired Helenita, the world’s most powerful electron microscope, for the Department of Physics and Astronomy. The microscope, manufactured by JEOL USA, has raised global awareness of UTSA and is attracting researchers from around the world. Also, San Antonio-based CPS Energy announced a 10-year, $50 million research initiative with UTSA’s Texas Sustainable Energy Research Institute to position San Antonio as a national leader in green technology research. In 2010, UTSA received Association for Assessment and Accreditation of Laboratory and Animal Care (AAALAC) International accreditation, elevating its animal research program to the likes of St. Jude Children’s Research Hospital, the American Red Cross and the National Institutes of Health.

UTSA research is as diverse as its students. Awards from federal, state and local agencies, as well as private foundations, support a wide range of basic and applied research projects, public service work and training programs. In 2011, UTSA received a $4.2 million grant from the U.S. Department of Education to increase the number of culturally and linguistically diverse students teaching science, technology, engineering and mathematics, targeting diverse student populations, specifically Latinos and low-income students.

The university continues to make great strides in its five areas of research strength: health, energy, security, sustainability, and human and social development. To that end, the university partners with a variety of local research organizations such as the UT Health Science Center San Antonio, Southwest Research Institute, Texas Biomedical Research Institute, the military, the government and local utilities. The university also maintains research collaborations across the nation and abroad.

UTSA is committed to enabling technology-based economic development in South Texas. The university is part of a technology commercialization ecosystem that includes pure, applied and translational research, intellectual property creation and licensing, and company formation, funding, education, staffing and incubation.

The University of Texas at San Antonio is committed to becoming recognized as a national research university, providing access to educational excellence and preparing citizen leaders for the global environment.

Howard L. Terry

Native Texan Howard L. Terry was born in Milam County in 1916. He attended the University of Texas at Austin on an athletic scholarship and earned his B.B.A. in 1938. He was employed by Procter & Gamble until 1942, when he entered the U.S. Navy and served as a P.T. Boat commander in the Pacific during World War II. He later returned to Procter & Gamble, from which he was recruited to set up a chain of appliance stores, serving as General Manager until 1951. At that time, Mr. Terry went into business for himself in lumber, building, and development, building several residential subdivisions in Texas and other states.

Over the following years, Mr. Terry founded several businesses in various fields, including Business Funds, Marathon Manufacturing, Crutcher Resources, Allied Bancshares, and Farm & Home Savings. Beginning in 1979, he became a director and chairman of the executive committee of Penn Central Corp., a position he held until 1986. In 1981, he founded the Terry Companies, a multi-state corporation involved in oil & gas exploration and development.

Howard Terry’s long and successful life came to an end in 2012 at age 95. In keeping with his own prediction, he maintained regular office hours and was active in the management of the Foundation until the very end of his life. His life was celebrated at a memorial service in Houston attended by a crowd estimated at 1,000.

Despite his series of remarkable successes in business endeavors in many fields, Howard Terry often referred to the Terry Foundation as his finest achievement. The impact of his generosity and vision will be felt by young Texans and their families for generations to come.

Nancy M. Terry

Nancy Terry is a native of New York State, born in Ogdensburg on the St. Lawrence River. She attended the School of Nursing at the University of Rochester, New York, where her hobbies included snow skiing, ice skating, swimming and antique collecting.

She subsequently relocated to Texas and for over forty years was married to Howard L. Terry, with whom she founded the Terry Foundation in 1986.

While no longer able to be active at Foundation events, Mrs. Terry follows from home her continued interest in the Foundation and the Terry Scholars.
ABOUT THE DIRECTORS AND STAFF

Rhett G. Campbell, Foundation Board Chair

Rhett Campbell served on the original Board of Directors of the Terry Foundation and has worked closely with Howard and Nancy Terry in the management and direction of the Foundation since its inception in 1986. He was named Board Chair in 2000.

Rhett is chair of the bankruptcy section of the Thompson & Knight law firm, where his areas of specialization include civil trial and business bankruptcy. He was a founding member in 1977 of the Houston law firm of Morris & Campbell, where he practiced until 2001. He holds both a B.A. (with high honors) and J.D. (with honors) from Southern Methodist University, where he was honored as a Hatton Sumners Scholar and as a member of Phi Beta Kappa, Order of the Coif, and Order of Barristers.

Rhett is married to Houston native Susie Seybold. They have three children and one grandchild and reside in Houston.

Edward T. Cotham Jr., President

Ed Cotham serves as President of the Terry Foundation, where he manages the Foundation endowment portfolio and serves as chief operating officer of the Foundation. In 1993, he was named President of Terry Petroleum Company. Prior to joining Terry Petroleum, Ed practiced law with the Morris & Campbell law firm in Houston.

Ed holds an undergraduate degree in Economics from the University of Houston and a master's degree in Economics from the University of Chicago. A native Texan, Ed returned to complete a law degree from the University of Texas at Austin.

Ed is a nationally recognized expert on Civil War history and has authored three books on military history. He and his wife, Candy, have one son and reside in Houston.

John W. Storms

John Storms has served on the Foundation Board of Directors since its inception in 1986. John is the Managing General Partner of Storms & Critz, Certified Public Accountants, of Houston. John also serves on the boards of other business entities and is an active member of the board of Child Advocates, Inc. of Houston.

John is a Certified Public Accountant and holds a B.B.A. from the University of Texas at Austin and an M.B.A. in taxation from the City University of New York.

John and his wife, Charlene, reside in Houston and have two daughters and five grandchildren.

R. Carter Overton III

Carter Overton has served on the Foundation Board of Directors since its inception in 1986. Carter is the President of Overton...
Energy LLC, a Houston-based management and investment company engaged in direct investment in U.S. oil and gas exploration and production. He worked previously for Terry Petroleum Company, where he served as Vice President of Operations. Carter is a past Chairman of the Texas Business Hall of Fame Foundation and is actively involved in his community and the River Oaks Baptist Church.

A native Houstonian, Carter received both his B.B.A. and his M.B.A. from the University of Texas at Austin.

Carter has two daughters, Josephine and Sophia, and resides with his wife, Elaine, in Houston, Texas.

Yvonne Rode Moody

Yvonne Rode Moody was one of the first Terry Scholars, a member of the original class in 1987. She was named to the Foundation Board in 2000, one of the first Alumni Scholars to be named to the Board.

A native of Fredericksburg, Yvonne received a B.S. in Mechanical Engineering from Texas A&M in 1991. She worked for eight years with Chevron as Construction Project Manager for the Houston Retail Marketing Group. Yvonne and her husband, Ted, live in San Antonio, where she now works full-time as mom to their two daughters, in occasional substitute teaching, and in many volunteer activities.

J.D. Davis

J.D. Davis, FSA was named to the Foundation Board of Directors in 2000. He is the Managing Principal of the Southern U.S. Employee Benefits Practice of Milliman, where he is also an actuary and retirement consultant.

A native of Quitman, Texas, J.D. became a Terry Scholar in 1989. He graduated from the University of Texas at Austin in 1993, where he received a B.A. in Economics (with highest honors). He also holds a master’s degree from Southern Methodist University.

J.D. is also the author of a recently-published biography of Southern musicians and first cousins Jerry Lee Lewis, Reverend Jimmy Swaggart, and Mickey Gilley. He lives with his three daughters in Sunnyvale, Texas, a suburb of Dallas.

Jeffrey C. Stichler

Jeff Stichler is an Associate Principal in the Conroe ISD. He was named to the Foundation Board in 2006, one of two new Scholar Alumni members named to the Board that year.

A native of Fort Stockton, Texas, Jeff was named a Terry Scholar at Texas A&M in 1990, where he graduated in 1995 with a B.S. in Kinesiology and a minor in History. He holds a Masters of Education degree from Sam Houston State University. Prior to his position in administration, Jeff taught advanced mathematics and coached for 11 years, seven years of which were at Conroe’s Caney Creek High School, where he was named Teacher of the Year and District Swim Coach of the Year.

Jeff lives in Conroe with his wife, Melanie, and their two children.

Gayle Stinson

Gayle Stinson was named to the Foundation Board in 2006, one of two new Scholar Alumni members named to the Board that year.

Gayle is Superintendent of Schools for the Lake Dallas ISD in north Texas. She served for six years in administration for the Texarkana Independent School District, where her outstanding tenure as principal of Texas High School resulted in her selection as Principal of the Year by the Texas Association of Secondary School Principals. Most recently, Gayle was named 2011 Superintendent of the Year in Region XI.

A native of Redwater, Texas, Gayle was one of the first Terry Scholars at the University of Texas at Austin, a member of the original class of 1987. She completed her B.S. in 1991 and subsequently earned an M.S. in Education from Texas A&M at Texarkana. Gayle was named a 2007 Outstanding Young Texas Ex by the University of Texas at Austin.

Gayle and her husband, Trent, reside with their three children in Hickory Creek, Texas

FOUNDATION STAFF

Pictured with Founder Howard Terry and President Ed Cotham are staff members Jamie Thyssen, Brandy N. Skillern, Beth Freeman (Director of Scholar Relations), and (standing) Becky Adams, Laura L. Sanders, and Robert L. Parker (Vice President-Administration).
Foundation Advisory Board

In 2008, the Board of Directors approved the formation of the Terry Foundation Advisory Board. Recognized by the Board for their professional achievements and commitment to the Foundation, a group of thirty-two outstanding Scholar Alumni were selected who assist the Board in an advisory role and at Foundation events throughout the year around the state.

The Foundation Advisory Board: (seated) Casie Kaluza Wenmohs, Kerry Keiser Ugarte, Director Yvonne Rode Moody, Ryan Assunto, Gayle Cerrato Hanz, Tammira Early Philippe, Abby Howell, Director Jeff Steehler, Wes Migura, Gregg Knaupe and Kathy Davis Duggan with (standing) Joseph Dowd, Board Chair Rhett Campbell, Allison Beckworth Readinger, Bob Gabriel, Chad Pinson, Jessica Scott, Brian Carroll, Ray Kerlick, President Ed Cotham, Brian Yarbrough, Susie Buck Hawthorne, Nellison Burns, Garth Beinart, and Meredith Blaschke Reyes. 2009 Austin Alumni Luncheon.
